Snipers Moon:

Gallipoli Sniper John Hamilton,2015-04-30 This is a well researched detailed and compelling story Defender Magazine Billy Sing was a small dark man and a deadly killer When as a member of the Australian Imperial Force 5th Light Horse he was thrust onto the narrow strip of land held by the Australians on Gallipoli he witnessed the terrible effects of the Turkish snipers and decided to fight fire with fire Using a simple Lee Enfield 303 rifle Sing began to pick off unwary Turks who exposed themselves Assisted by a spotter who would single out targets for him Sing acquired an unrivalled reputation as he killed increasing numbers of enemy soldiers He became known as the Anzac Angel of Death and the Assassin of Gallipoli and was considered to be the most successful sniper and most feared man in Gallipoli The Turks aware of his reputation decided to target the Sing with their own marksman In a deadly duel Sing fired first and killed Abdul the Terrible This a vivid account of the merciless nature of the fighting in the Gallipoli Campaign from an award winning journalist and best selling author

Space Weapons and International Security Bhupendra Jasani,1987 The efforts of the United States to develop defences against ballistic missiles the Strategic Defense Initiative is one of the most hotly debated topics of our time This authoritative book contributes to the debate by presenting th searching and wide ranging views of twenty six international experts on the technical legal political and military aspects of space weapons They address such questions as What are the technological promises and problems of strategic defence What effects will SDI have on the arms race or on deterring nuclear war How do China India and Japan perceive SDI What can be done to guard international stability These papers which express every range of opinion on SDI from an unqualified approval to total scepticism are prefaced by an overview by the editor of the volume *Preventing Chemical Weapons* Michael Crowley,Malcolm Dando,Lijun Shang,2018-08-20 The life and chemical sciences are in the midst of a period of rapid and revolutionary transformation that will undoubtedly bring societal benefits but also have potentially malign applications notably in the development of chemical weapons Such concerns are exacerbated by the unstable international security environment and the changing nature of armed conflict which could fuel a desire by certain States to retain and use existing chemical weapons as well as increase State interest in creating new weapons whilst a broader range of actors may seek to employ diverse toxic chemicals as improvised weapons Stark indications of the multi faceted dangers we face can be seen in the chemical weapons attacks against civilians and combatants in Iraq and Syria and also in more targeted chemical assassination operations in Malaysia and the UK Using a multi disciplinary approach and drawing upon an international group of experts this book analyses current and likely near future advances in relevant science and technology assessing the risks of their misuse The book examines the current capabilities limitations and failures of the existing international arms control and disarmament architecture notably the Chemical Weapons Convention in preventing the development and use of chemical weapons Through the employment of a novel Holistic Arms Control methodology the authors also look beyond the bounds of such treaties to explore the full range of

international law international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents in order to develop recommendations for more effective routes to combat their proliferation and misuse A particular emphasis is given to the roles that chemical and life scientists health professionals and wider informed activist civil society can play in protecting the prohibition against poison and chemical weapons and in working with States to build effective and responsive measures to ensure that the rapid scientific and technological advances are safeguarded from hostile use and are instead employed for the benefit of us all **Secret Weapons and World War II** Walter E.

Grunden,2005 Grunden s analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of World War II Comparing the science and weapons programs of all the major combatants he demonstrates that Japan s failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries In the end Japan could not overcome these obstacles and thus failed to make the transition to the kind of Big Science it needed to ward off its enemies and dominate the Far East **BOOK JACKET** **A Naval Encyclopædia** ,1880 **With the Guns West and**
