Social Accountability In Communication:

Social Accountability in Communication Richard Buttney,1993-12-07 Much of our talk revolves around accounting for our own and other people's actions. We praise one person and blame another, justify our own actions, speculate on motives, tell and retell problematic events. This volume draws upon speech communication, sociology and social psychology to offer an original approach to such accounts. Richard Buttney examines social accountability within communication contexts that range from a therapy session to welfare and broadcast news interviews from everyday conversation to discussions in a Zen monastery. Throughout his wide ranging analysis of accounts talk he integrates conversation analytic methods with social constructionism

Responsibility Communication Amy O'Connor,2022-11-22 Winner of the National Communication Association's Public Relations Division 2023 Outstanding Book Award. This handbook is a resource for students, faculty and researchers who are focused on understanding the role communication plays in the formation and execution of corporate social responsibility (CSR) activities. Bringing together authors who are thought leaders and emerging scholars from diverse theoretical and methodological perspectives, it examines the issues central to CSR communication, including theoretical underpinnings, form and content of CSR messaging, the boundaries of engagement and the tensions associated with CSR communication. It offers a unique combination of functional and formative approaches to CSR communication designed to expose readers to a blend of approaches. With attention to issues of diversity, equity and inclusion, this handbook also explicitly addresses recent societal changes and how those changes will impact CSR communication research and practices in the future. Communicating Corporate Social Responsibility in the Digital Era

Adam Lindgreen, Joelle Vanhamme, Rebecca Watkins, Francois Maon,2017-12-12 Although literature on corporate social responsibility is vast, research into the use and effectiveness of various communications through digital platforms about such corporate responsibility is scarce. This gap is surprising: communicating about corporate social responsibility initiatives is vital to organizations that increasingly highlight their corporate social responsibility initiatives to position their corporate

brands for both consumers and other stakeholders Yet these organizations still sometimes rely on traditional methods to communicate or even decide against communicating at all because they fear triggering stakeholders skepticism or cynicism A systematic interdisciplinary examination of corporate social responsibility communication through digital platforms therefore is necessary to establish an essential definition and up to date picture of the field This research anthology addresses the above objectives Drawing on marketing management and communication disciplines among others this anthology examines how organizations construct implement and use digital platforms to communicate about their corporate social responsibility and thereby achieve their organizational goals The 21 chapters in this anthology reflect six main topic sections Challenges and opportunities for communicating corporate social responsibility through digital platforms Moving toward symmetry and interactivity in digital corporate social responsibility communication Fostering stakeholder engagement in and through digital corporate social responsibility communication Leveraging effective digital corporate social responsibility communication Digital activism and corporate social responsibility Digital methodologies and corporate social responsibility

Mechanisms that promote accountability on the part of public institutions supply side in terms of horizontal accountability as well as mechanisms that promote governments being held accountable by civil society demand side in terms of social and vertical accountability are both essential for achieving effective sustainable development outcomes. Most communications initiatives supported by the World Bank and other donors have focused primarily on the supply side of accountability and not on strengthening the demand side through actions that enable the poor and civil society organizations CSOs to create and effectively utilize spaces for public voice and community mobilization. The poor have limited influence in the production of information and limited access to channels of communication in most countries borrowing from the World Bank. This condition is reflected in two areas the concentration on ownership of key media institutions and asymmetric access to mediums of communication **Communication Ethics and Global Change** Thomas William Cooper, 1989
