**Marketing and Social Construction** Chris Hackley, 2003-08-29 Marketing is at the centre of the business education boom: a million or more people worldwide are studying the subject at any one time. Yet despite widespread discontent with the intellectual standards in marketing, very little has changed over the past thirty years. In this ground breaking new work, Chris Hackley presents a social constructionist critique of popular approaches to teaching, theorising and writing about marketing. Drawing on a wide range of up to date European and North American studies, Dr Hackley presents his argument on two levels. First, he argues that mainstream marketing's ideologically driven curriculum and research programmes dominated by North American tradition reproduce

business school myths about the nature of practically relevant theory and the role of professional education in management fields Second he suggests a broadened theoretical scope and renewed critical agenda for research theory and teaching in marketing Intellectually rigorous yet comprehensible this work will be of vital importance to all those interested in the future of teaching and research in business and management

**The Social Construction of SARS** John Henry Powers,Xiaosui Xiao,2008 When the SARS virus began its spread from southern China around the world in spring 2003 it caught regional and international health officials by surprise The SARS epidemic itself lasted for only a few months whereas its treatment in communicative terms keeps providing us with important lessons that can prepare us all for the much larger pandemic that many are predicting will eventually occur While the medical aspects of SARS are now relatively well understood the discursive rhetorical dimensions are much less so As an international epidemic SARS arrived in a number of distinctive societies with the result that different communities handled the crisis in different ways some far more effectively than others Accordingly the 12 chapters in *The Social Construction of SARS* are studies of how a major health related crisis was understood and dealt with from a communicative perspective in such diverse places as Hong Kong mainland China Singapore Taiwan Canada and the United States during the SARS outbreak

*The Social Construction of Mental Illness and Its Implications for Neuroplasticity* Michael T. Walker,2016-09-14 *The Social Construction of Mental Illness and Its Implications for Neuroplasticity* examines how the current concept of mental illness in society informs the dialogic skills and perspectives of psychotherapists The common interpretation of unconventional behavior as a symptom of illness has marginalized the creative class and deterred mental health professionals from developing the skills and perspectives needed to empower their clients Too often the neuroplasticity of the human brain is ignored in favor of the organizing metaphor of chemical imbalance which often results in the relegation of clients needs to the pharmaceutical industry Michael T Walker encourages psychotherapists to evolve their practice by considering the new information available in neuroscience psychotherapy outcome studies and postmodern psychotherapies

Hibberd, 2005-01-10 For more than half of the 20 century psychologists sought to locate the causes of behaviour in individuals and tended to neglect the possibility of locating the psychological in the social In the late 1960s a reaction to that neglect brought about a crisis in social psychology This crisis did not affect all social psychologists some remained seemingly oblivious to its presence others dismissed its significance and continued much as before But in certain quarters the psychological was reconceptualised as the social and the social was taken to be sui generis Moreover the possibility of developing general laws and theories to describe and explain social interaction was rejected on the grounds that as social beings our actions vary from occasion to occasion and are for many reasons unrepeatable There is so it was thought an inherent instability in the phenomena of interest The nomothetic ideal was said to rest on individualistic cause effect positivism of the kind which arguably characterised the natural sciences but social psychology so it was said is an historical inquiry and its conclusions are necessarily historically relative Gergen 1973 Events outside psychology converged to give impetus to the crisis within

Hypertext and the Technology of Conversation Susan H Gray, 1993-08-30 This book explores the usefulness of looking at very small aspects of human behavior in order to understand computer human interaction difficulties with hypertext The focus is on both mechanical actions and talk as social action While this approach has been used fruitfully to study human human interaction Gray has constructed a unique study of human interaction with machines *The American Statehouse* Charles T. Goodsell, 2001 The American statehouse then is not just a temple of the state but a temple of democracy of the people **BOOK JACKET** *Rediscovering the Democratic Purposes of Education* Lorraine McDonnell, P. Michael Timpane, Roger W. Benjamin, 2000 Why do America's public schools seem unable to meet today's social challenges As competing interest groups vie over issues like funding and curricula we seem to have lost sight of the democratic purposes originally intended for public education Public schools were envisioned by the Founders as democratically run institutions for instilling civic values but today's education system seems more concerned with producing good employees than good citizens

Meanwhile our country's diversity has eroded consensus about citizenship and the professionalization of educators has diminished public involvement in schools. This volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education. Nine original articles by some of today's leading education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be redefined and revived. It both establishes the intellectual foundation for revitalizing American schools and offers concrete ideas for how the educational process can be made more democratic. The authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship. An initial series of articles reexamines the original premise of American education as articulated by important thinkers like Jefferson and Dewey. A second group identifies flaws in how schools are currently governed and offers models for change. A final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy. Spanning philosophy, history, sociology, and political science, this book brings together the best current thinking about the specifics of education policy: vouchers, charter schools, national testing, and about the role of deliberation in a democracy. It offers a cogent alternative to the exchange paradigm and shows how much more needs to be understood about an issue so vital to America's future.
