The Pleiades:

The Orion Prophecy Patrick Geryl, Gino Ratinckx, 2001 In the year 2012 the Earth awaits a super catastrophe its magnetic field will turn over in one go Phenomenal earthquakes and tidal waves will completely destroy our civilisation Europe and North America will shift thousands of kilometres northwards into polar climate Nearly the whole earth's population will perish in the apocalyptic happenings These dire predictions stem from Mayans and Egyptians descendants of the legendary Atlantis The Atlanteans had highly evolved astronomical knowledge and were able to exactly calculate the previous world wide flood in 9792 BC They built tens of thousands of mandjits and escaped to South America and Egypt In the year 2012 Venus Orion and several other stars will take the same code positions as in 9792 BC the year of the previous cataclysm For thousands of years historical sources have told of a forgotten time capsule of ancient wisdom located in a mythical labyrinth of secret chambers filled with artefacts and documents from the previous flood this book gives one possible location

Exploring Ancient Skies David H. Kelley, Eugene F. Milone, 2011-02-16 Exploring Ancient Skies brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean the Far East and the New World particularly Mesoamerica putting the ancient astronomical materials into their archaeological and cultural contexts The authors begin with an overview of the field and proceed to essential aspects of naked eye astronomy followed by an examination of specific cultures The book concludes by taking into account the purposes of ancient astronomy astrology navigation calendar regulation and not least the understanding of our place and role in the universe Skies are recreated to display critical events as they would have appeared to ancient observers events such as the supernova of 1054 A D the lion horoscope and the Star of Bethlehem Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation It will be useful as a reference for scholars and as a text for students in both astronomy and archaeology and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history

of *Space Engineering, Archaeology, and Heritage* Ann Darrin, Beth L. O'Leary, 2009-06-26 Some might think that the 27 thousand tons of material launched by earthlings into outer space is nothing more than floating piles of debris. However, when looking at these artifacts through the eyes of historians and anthropologists instead of celestial pollution, they are seen as links to human history and heritage. *Space The New Frontier for Archaeology* Researches on the Zodiacal Light and on a Photographic Determination of the Atmospheric Absorption Harvard College Observatory, 1893 *The Lexicon of Proto-Oceanic* Malcolm Ross, Andrew Pawley, Meredith Osmond, 2007-03-01 This is the second in a series of five volumes on the lexicon of Proto Oceanic, the ancestor of the Oceanic branch of the Austronesian language family. Each volume deals with a particular domain of culture and/or environment and consists of a collection of essays, each of which presents and comments on lexical reconstructions of a particular semantic field within that domain. Volume 2 examines how Proto Oceanic speakers described their geophysical environment. An introductory chapter discusses linguistic and archaeological evidence that locates the Proto Oceanic language community in the Bismarck Archipelago in the late 2nd millennium BC. The next three chapters investigate terms used to denote inland, coastal, reef, and open sea environments and meteorological phenomena. A further chapter examines the lexicon for features of the heavens and navigational techniques associated with the stars. How Proto Oceanic speakers talked about their environment is also described in three further chapters which treat property terms for describing inanimate objects, locational and directional terms, and terms related to the expression of time.
