water - correct answer-polar molecule

- polar covalent bonds

- oxygen end is partial negative and the hydrogens have a partially positive end

- cohesive

polar covalent bonds - correct answer-opposite ends of the molecule have opposite charges

cohesion - correct answer-H bonding between H₂O creates it (sticky)

- allows for the movement of water against gravity

- high surface tension

- water moves up a tree by transpiration (helped by ____)

adhesion - correct answer-H₂O molecules form H bonds with other substances

- ~capillary action

- ~meniscus

- ~water climbs up fiber

solvent - correct answer-water is the universal one

- polar water molecules will surround the (+) and (-) ions causing the ions to separate and dissolve

- dissolve solutes and create aqueous solutions

hydrophilic - correct answer-some molecules have an affinity for water

- polar and ionic molecules

- ex: cotton, cellulose, paper

The Impacts of Biofuels on the Economy, Environment, and Poverty Govinda R. Timilsina, David Zilberman, 2014-05-20 Interest in biofuels began with oil shocks in the 1970s but the more rapid development and consumption of biofuel industry in recent years has been primarily driven by mandates subsidies climate change concerns emissions targets and energy security. From 2004 to 2006 fuel ethanol grew by 26% and biodiesel grew by 172%. As biofuel production continues to expand investments in capacity expansion and research and development have been made. The 2008 food crisis emphasized the need to re-examine biofuel consequences. Biofuels remain an important renewable energy resource to substitute for fossil fuels particularly in the transportation sector yet biofuels success is still uncertain. The future of biofuels in the energy supply mix relies on mitigating potential and improving the environmental gains. This book brings together leading authorities on biofuel from the World Bank to examine all of the impacts of biofuel economic social environmental within a unified framework and in a global perspective making it of interest to academics in agricultural and environmental economics as well as industry and policy makers

Electronic Noses and Tongues in Food Science Maria Luz Rodriguez Mendez, 2016-02-19 *Electronic Noses and Tongues in Food Science* describes the electronic products of advanced chemical and physical sciences combined with intuitive integration of microprocessors advanced bioinformatics and statistics. These include for example voltammetric bio-electronic piezoelectric platforms made from a variety of components including nanoparticles enzyme biosensors heavy metals graphite epoxy composites metal oxide semiconductors microelectrodes microfluidic channels pre-manufactured gas sensors redox enzymes and others and is an ideal resource for understanding and utilizing their power in Food Science settings. Devices used to analyse one particular food item can

theoretically be adapted for other food items or components This does not just mean the re deploying the physical platforms but also the mode of bioinformatic and statistical analysis This includes artificial neural networks ANN linear discriminant analysis LDA partial least squares PLS principal component analysis PCA etc In other words there is cross transference of chemistry physics concepts techniques findings and approaches from one food to another Electronic noses and tongues are two of these devices but are advancing in application and importance This book provides examples of the use of electronic noses and tongues to characterise components that contribute to sensory or compositional profiles from ripening to harvesting and from storage of raw materials to packaging and consumption These devices are suitable for high throughput analysis quality control or to determine the nature and extent of spoilage and adulteration and have also been used to ascertain the geographical origins of food and mixtures Presents latest developments in the application of electronic nose and tongue technologies to a variety of food specific needs Includes both electronic nose electronic tongue and combined technology insights Each chapter has sections on The physical and chemical platforms Analysis of specific foods Applications to other foods and areas of food science
