Dilsaver, Timothy J. Babalis, 2023 Off the coast of California running from Santa Barbara to La Jolla lies an archipelago of eight islands known as the California Channel Islands The northern five were designated as Channel Islands National Park in 1980 to protect and restore the rich habitat of the islands and surrounding waters In the years since that mission intensified as scientists discovered the extent of damage to the delicate habitats of these small fragments of land and to the surprisingly threatened sea around them In *Restoring Nature* Lary M Dilsaver and Timothy J Babalis examine how the National Park Service has attempted to reestablish native wildlife and vegetation to the five islands through restorative ecology and public land management The Channel Islands staff were innovators of the inventory and monitoring program whereby the resource problems were exposed This program became a blueprint for management throughout the U S park system Dilsaver and Babalis present an innovative regional and environmental history of a little known corner of the Pacific West as well as a larger national narrative about how the Park Service developed its approach to restoration ecology which became a template for broader Park Service policies that shaped the next generation of environmental conservation
