The Continuity Of Consciousness:

Stream of Consciousness Barry Dainton, 2006 An in depth investigation into the phenomenology of conscious experience the nature of awareness introspection phenomenal space and time consciousness A fascinating and probing study **The Continuity of Consciousness** John T. Ferrier, 1934-01-01 *The Immortal Mind* Ervin Laszlo, 2014-10-09 Scientific evidence for the continual presence of consciousness with or without connection to a living organism Examines findings on the survival of consciousness beyond life including near death experiences after death communication and reincarnation Explains how this correlates precisely with cutting edge physics theories on superstrings information fields and energy matrices Reveals how consciousness manifests in living beings to continue its evolution Evidence now points to consciousness existing beyond the brain such as when the brain is temporarily incapacitated as well as to the survival of consciousness after death Conventional science prefers to dismiss these findings because they cannot be accommodated by a materialist view of reality Spirituality and religion embrace the continuity of consciousness and ascribe it to a nonmaterial spirit or soul that is immortal As such spirituality religion and science continually find conflict in their views But what if there truly is no conflict Based on a new scientific paradigm in sync with experience based spirituality Ervin Laszlo and Anthony Peake explore how consciousness is continually present in the cosmos and can exist without connection to a living organism They examine the rapidly growing body of scientific evidence supporting the continuity of consciousness including near death experiences after death communication reincarnation and neurosensory information received in altered states They explain how the persistence of consciousness beyond the demise of the body means that in essence we are not mortal we continue to exist even when our physical existence has come to an end This correlates precisely with cutting edge physics which posits that things in our plane of time and space are not intrinsically real but are manifestations of a hidden dimension where they exist in the form of superstrings information fields and energy matrices With proof that consciousness is basic to the cosmos and immortal in its deeper nonmanifest realm Laszlo and Peake reveal the purpose of consciousness is to manifest in living beings in order to continuously evolve *An Ontology of Consciousness* R. Ellis, 2013-03-09 The object of this study is to find a coherent theoretical approach to three problems which appear to interrelate in complex ways 1 What is the ontological status of consciousness 2 How can there be an unconscious prereflective or self alienated consciousness And 3 Is there a self or ego formed by means of the interrelation of more elementary states of consciousness The motivation for combining such a diversity of difficult questions is that we often learn more by looking at interrelations of problems than we could by viewing them only in isolation The three questions posed here have emerged as especially problematic in the context of twentieth century philosophy 1 The question of the ontological status of consciousness The question What is consciousness is one of the most perplexing in philosophy so perplexing that many have been motivated to proceed as though consciousness did not exist If William James was speaking rhetorically when he said Consciousness does not exist 1 many behaviorists of the recent past

were not 2 James meant only to imply that consciousness is not an independently existing soul substance along side physical substances He did not mean that we do not really have consciousness and he did not provide final resolution for the problem of the causal interrelations between consciousness and the physical realm e g our bodies Many recent philosophers and psychologists however try to proceed as though these problems did not exist The Continuity of Consciousness John Todd Ferrier,1951

Knowledge, Belief and Certitude Frederick Storrs Turner,1900 The Continuity of Consciousness William D. Schul,1967 **The London Quarterly Review** ,1880 **Philosophy and Psychology of Time** Bruno Mölder,Valtteri Arstila,Peter Øhrstrøm,2015-11-02 This book is an edited collection of papers from international experts in philosophy and psychology concerned with time The collection aims to bridge the gap between these disciplines by focussing on five key themes and providing philosophical and psychological perspectives on each theme The first theme is the concept of time The discussion ranges from the folk concept of time to the notion of time in logic philosophy and psychology The second theme concerns the notion of present in the philosophy of mind metaphysics and psychology The third theme relates to continuity and flow of time in mind One of the key questions in this section is how the apparent temporal continuity of conscious experience relates to the possibly discrete character of underlying neural processes The fourth theme is the timing of experiences with a focus on the perception of simultaneity and illusions of temporal order Such effects are treated as test cases for hypotheses about the relationship between the subjective temporal order of experience and the objective order of neural events The fifth and the final theme of the volume is time and intersubjectivity This section examines the role of time in interpersonal coordination and in the development of social skills The collection will appeal to both psychologists and philosophers but also to researchers from other disciplines who seek an accessible overview of the research on time in psychology and philosophy **The London Quarterly and Holborn Review** ,1880 An Introduction to Comparative Psychology C. Lloyd Morgan,1894

The Elements of Psychology David Jayne Hill,1888 **Body and will** Henry Maudsley,1884 **London Quarterly Review** ,1880 *Psychology: Empirical and Rational* Michael Maher,1900 *The Psychology of Consciousness* G. William Farthing,1992 The first book on consciousness that offers sufficient breadth and depth to serve as a stand alone text for courses on consciousness Also ideally organized as a supplement for instructors who discuss topics of consciousness in other courses Journey into the fascinating world of human consciousness with this comprehensive survey that covers topics of consciousness from both a natural science and cognitive psychology viewpoint Based on the belief that consciousness is a natural phenomenon and product of the brain s functioning Dr Farthing s

captivating book emphasizes systematic research and theoretical interpretations and also discusses clinical applications and pertinent conceptual and philosophical issues The Theory of Knowledge Leonard Trelawny Hobhouse, 1896 *Death and After* Manly Palmer Hall, 1926 **Ontology after Philosophical Psychology** Michela Bella, 2019-08-21

Ontology after Philosophical Psychology addresses the question of William James's continuity of consciousness with a view to its possible actualizations. In particular, Michela Bella critically delineates James's discourse. In the wake of Darwin's theory of evolution at the end of the nineteenth century, James's reflections emerged in the field of physiological psychology where he developed for the case for a renewed epistemology and a new metaphysical framework to help us understand the most interesting theories and scientific discoveries about the human mind. Bella's analysis of the theme of continuity makes it possible to appreciate both historically and theoretically the importance of James's gradual transition from making observations of experimental psychology on the continuity of thought to developing an epistemological and ontological argument that continuity is a characteristic of experience and reality. This analysis makes it possible both to clarify James's position in relation to his historical context and to highlight the most original results of his work.
