Narrow Content Juhani Yli-Vakkuri, John Hawthorne, 2018 Can there be narrow mental content that is entirely determined by the goings on inside the head of the thinker This book argues not and defends instead a thoroughgoing externalism the entanglement of our minds with the external world runs so deep that no internal component of mentality can easily be cordoned off *Handbook for Teaching Introductory Psychology* Michelle Rae Hebl, Charles L. Brewer, Ludy T. Benjamin, Jr., 2001-08-01 Like its predecessors Volume III of the Handbook for Teaching Introductory Psychology provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom It contains an organized collection of articles from Teaching of Psychology TOP the official journal of the Society for the Teaching of Psychology Division 2 of the American Psychological Association Volume III contains 89 articles from TOP that have not been included in other volumes Another distinction between this volume and its predecessors is its emphasis on testing and assessment The book is divided into two sections Section One Issues and Approaches in Teaching Introductory Psychology contains 52 articles on critical issues such as how to approach the course understanding students interests perceptions and motives students existing knowledge of psychology including their misconceptions a comparison of introductory textbooks and tips on how to evaluate them test questions and student factors affecting exam performance an overview of different forms of feedback giving extra credit and how to deal with academic dishonesty Section Two consists of 37 articles that present demonstrations class and laboratory projects and other techniques to enhance teaching and learning in both the introductory as well as advanced courses in the discipline This section is organized so as to parallel the order of topics found in most introductory psychology textbooks Intended for academicians who teach the introductory psychology course and or oversee grad assistants who teach the course all royalties of the book go directly to the Society for the Teaching of Psychology to promote its activities to further improve the teaching of psychology *Preparing 21st Century Teachers for Teach Less, Learn More (TLLM) Pedagogies* Kumar, Pradeep, Keppell, Michael James, Lim, Chee Leong, 2019-12-27 The current trend of learner centeredness in education has been challenging many of the current ways of working especially in higher education institutions This rapid change in educational institutions demands educators acquire new sets of skills via continuous reflective practices Hence educators in higher education institutions are actively involved in research driven teaching and learning practices This change of role from mere content delivery to learning facilitators could be better achieved through a strong research driven community of practice Preparing 21st Century Teachers for Teach Less Learn More TLLM Pedagogies is a pivotal reference source that provides vital research on the application of practice based learning techniques in higher education institutions This publication establishes a platform for academics to share their best practices to promote teach less learn more pedagogies and learn reciprocally from the community of practice While highlighting topics such as interactive learning experiential technology and logical thinking skills this book is ideally
