A The Outer Limits of the Continental Shelf The 1982 United Nations Convention on the Law of the Sea herein ter the Convention marks the beginning of a new era in the law of 1 the sea The negotiations for this treaty at the Third United Nations Conference for the Law of the Sea hereinafter UNCLOS III lasted for nine years from 1973 to 1982 The Convention regulates the principal aspects of international oceans affairs It establishes and fixes the limits of maritime zones provides for the rights and duties of states in these zones establishes the law app cable in the international seabed area on the basis of the principle of common heritage of mankind imposes obligations on states to protect the marine environment and provides for the means of dispute sett ment One of the most contentious and divisive issues at UNCLOS III were the outer limits of the continental shelf Previously in the 1958 Con 2 vention on the Continental Shelf hereinafter the 1958 Convention no limits were established for the continental shelf States were allowed to claim areas of continental shelves based on their capacity to exploit the mineral resources of the shelf The legal framework in the 1958 Convention would obviously conflict with the principle of the common heritage of mankind Delegates realized that limits have to be est lished but up to where and on the basis of which principles was a c tentious question **The Continental Shelf Beyond 200 Nautical Miles** Joanna Mossop, 2016-12-22 Under the United Nations Law of the Sea Convention States have sovereign rights over the resources of their continental shelf out to 200 nautical miles from the coast Where the physical shelf extends beyond 200 nautical miles States may exercise rights over those resources to the outer limits of the continental shelf More than 80 States may be entitled to claim sovereign rights over their continental shelf where it extends beyond 200 nautical miles from their coast and the Commission on the Limits of the Continental Shelf is currently examining many of these claims This book examines the nature of the rights and obligations of coastal States in this area with a particular focus on the options for regulating activities on the extended continental shelf Because the extended continental shelf lies below the high seas the area poses unique legal challenges for coastal States that are different from those faced in respect of the shelf within 200 nautical miles In addition the United Nations Convention on the Law of the Sea imposes some specific obligations that coastal States must comply with in respect of the extended continental shelf The book discusses the development of the concept of the extended continental shelf It explores a range of issues facing the coastal State in regulating matters such as environmental protection fishing bioprospecting exploitation of non living resources and marine scientific research on the extended continental shelf The book proposes a framework for navigating the intersection between the high seas and the extended continental shelf and minimising the potential for conflict between flag and coastal States **The Continental Shelves** John F. Waters, 1975-01-01 Describes the continental shelves and discusses their present and potential uses **The**
