## **The Limits Of Grammaticalization Typological Studies In Language:**

The Limits of Grammaticalization Anna Giacalone Ramat, Paul J. Hopper, 1998-01-01 The earliest use of the term grammaticalization was to refer to the process whereby lexical words of a language such as English keep in he keeps bees become grammatical forms such as the auxiliary in he keeps looking at me Changes of this kind which involve semantic fading and a downshift from a major to a minor category have generally been agreed to come under the heading of grammaticalization But other changes that equally contribute to new grammatical forms do not involve this kind of fading In recent years a debate has arisen over how to constrain the term theoretically Is grammaticalization to be distinguished from lexicalization the creation and fixing of new words out of older patterns of compounding If so how is the line to be drawn between a form that is grammatical and one that is lexical Should the term grammaticalization be extended to the study of the origins of grammatical constructions in general If so it will have to include broader issues such as word order change and the reanalysis of phrases What principles govern these processes Is grammaticalization a unidirectional event or can change occur in the reverse direction The authors of the papers in this volume approach these important questions from a variety of data types including historical texts creoles and a typologically broad sample of modern and ancient languages

**Grammaticalization and Language Change** Kristin Davidse, Tine Breban, Lieselotte Brems, Tanja Mortelmans, 2012-10-30 This collective volume focuses on the latest developments in the study of grammaticalization and related processes of change such as degrammaticalization constructionalization lexicalization and petrification It addresses topical issues relating to the motivations sources defining features and outcomes of these changes New theoretical reflections are offered on the pragmatic motivation of grammaticalization paths process oriented differences between grammaticalization lexicalization and degrammaticalization the question of gradualness and pace of grammaticalization and deictics as a distinct source of grammaticalization The articles describe various constructional and distributional changes affecting deictics determiners reflexives clitics nouns affixes adverbs and auxiliary verbs mainly in the Germanic and Romance languages The volume will be of great interest to historical linguists working on grammaticalization and related changes and to all linguists working on the interface between morphosyntax semantics pragmatics and discourse

*Signergy* C. J. Conradie, Ronèl Juhl, Marthinus Beukes, 2010 The title of this volume strives to capture the dynamic scope and range of the essays it contains applying insights into the workings of iconicity to texts as far removed from each other in time as the Medieval tale of a bishop fish and the war poems of 20th century Italian Futurist F T Marinetti and as thematically diverse as the Pilgrim's Progress and the poetry of e e cummings Applications reference both language and linguistics as well as literature and literary theory and related fields such as sign language and translation the former approached from the point of view of Japan Sign Language the latter with reference to translations of the Koran and the Sesotho Bible as well as modern German and English Bible translations On the language side the intricate relationships

between sound symbolism and etymology and between analogy and grammaticalization are examined in depth On the literary side the iconic effects of techniques such as enjambment and metrical inversion are considered but also the ways in which an understanding of iconicity can open up meanings in complex poetry like that of the Afrikaans poet T T Cloete in this particular instance three poems inspired by figures as diverse as Dante Paul Klee and the pop icon Marilyn Monroe In view of the fact that form is able to mime meaning and meaning itself can be mimed by meaning the theoretical question is asked on the basis of a wide range of examples from literature language music and other sign systems whether meaning can also mime form An introduction to the work of H C T Muller an early scholar in the field of iconicity highlights a regrettably little known South African contribution to the development of iconicity theory *Formal Evidence in Grammaticalization Research* An Van linden, Jean-Christophe Verstraete, Kristin Davidse, 2010 The present volume finds its origin in the conference From ideational to interpersonal Perspectives from grammaticalization FITIGRA held at the University of Leuven from 10 to 12 February 2005 *Comparative Studies in Early Germanic Languages* Gabriele Diewald, Leena Kahlas-Tarkka, Ilse Wischer, 2013-10-10 This volume offers a coherent and detailed picture of the diachronic development of verbal categories of Old English Old High German and other Germanic languages Starting from the observation that German and English show diverging paths in the development of verbal categories even though they descended from a common ancestor language the contributions present in depth empirically founded studies on the stages and directions of these changes combining historical comparative methods with grammaticalisation theory This collection of papers provides the reader with an indispensable source of information on the early traces of distinct developments thus laying the foundation for a broad scale scenario of the grammaticalisation of verbal categories The volume will be of particular interest to scholars of language change grammaticalisation and diachronic sociolinguistics it offers important new insights for typologists and for everybody interested in the make up of verbal categories Complementizer Semantics in European Languages Kasper Boye, Petar Kehayov, 2016-07-11 Complementizers may be defined as conjunctions that have the function of identifying clauses as complements In recent years it has become increasingly clear that they have additional functions Some of these functions are semantic in the sense that they represent conventional contributions to the meanings of the complements The present book puts a focus to these semantic complementizer functions Studies in Language , 2005 *Paradigms in Word Formation* Alba E. Ruz, Cristina Fernández-Alcaina, Cristina Lara-Clares, 2022-09-15 The focus of Paradigms in Word Formation Theory and applications is on the relevance of paradigms for linguistic description Paradigmatic organization has traditionally been considered an inherent feature of inflectional morphology but research in the last decades clearly shows the existence of paradigms in word formation especially in affixal derivation often at the expense of other word formation processes This volume seeks to address the role that paradigms may play in the description of compounding conversion and participles This volume should be of interest to anyone specialized in the field of English morphology and word formation **The Limits of**
