Bellman, 1956 The purpose of this paper is to discuss some variational problems arising from mathematical economics and some of the methods that can be used to treat these questions both analytically and computationally The discussion is limited to important and interesting classes of processes allocation and smoothing processes and to a discussion of the application of the theory of dynamic programming to those processes Author **The Bellman Continuum** Robert S Roth, 1987-02-01 This volume is a collection of some of the most significant mathematical works of Prof Richard E Bellman Ten areas of Prof

Bellman's mathematical research were selected by his co workers for this volume Each chapter starts with an introductory comment on the significance of Bellman's contribution Some important mathematical theories are put forward and their applications in physics and biology such as the mathematical aspect of chemotherapy and the analysis of biological systems are included in this book **Dynamic Programming.
