Rubrics for Assessing Student Achievement in Science Grades K-12 Hays B. Lantz, 2004-02-06 I recommend *Rubrics for Assessing Student Achievement in Science Grades K 12* to any school district that is moving toward a standards based curriculum. It will serve as a valuable tool for assessing student learning. Grace Cisek, Director of Mathematics and Science Curriculum, Chester County Intermediate Unit, PA. At last, science educators will now be able to use custom made rubrics to assess and evaluate student performance in the standards based science classroom. Combining clarity, detail, utility, and practicality, veteran educator and author Hays B. Lantz Jr. offers the most complete collection of evaluation and assessment tools in science education available today. This concise handbook was designed to improve the quality and uniformity of evaluation as well as assessment of student progress. Written in language appropriate for both students and teachers in grades K 12, there are over 100 ready to use performance lists, holistic rubrics, and analytic rubrics that contain clear descriptions of the particular traits and qualities desired in student products and performances. Key features distinguishing this book include: Scoring tools for a wide range of products and performances found in effective science classrooms and programs; Assessment tools that differentiate by learning levels, providing a scaffolding of increasingly complex expectations across the grades; Years of extensive field testing of the evaluative criteria. *Rubrics for Assessing Student Achievement in Science Grades K 12* is a valuable resource that will help to measure what students know and are able to do in the science classroom. It will yield more consistent and defensible judgments, more precise feedback, and sharper student learning and performance.

Assessment in Science Maureen McMahon, 2006 If you want to learn about the latest research on assessment techniques that really work, the ideal sourcebook is right here in your hands. *Assessment in Science* is a collection of up to date reports by authors who are practicing K 16 classroom teachers and university based educators and researchers.

Improving Learning Through Assessment Rubrics: Student Awareness of What and How They Learn Gonsalves, Chahna, Pearson, Jayne, 2023-08-14 Assessment by rubrics has emerged as a tool with great potential to guide successful student learning from a competency based approach. Rubrics as instruments that make it possible to share the criteria for carrying out learning and assessment tasks with students are excellent roadmaps for student learning, largely because they allow students to know what they are expected to do and what they are expected to achieve by carrying out the learning tasks. *Improving Learning Through Assessment Rubrics: Student Awareness of What and How They Learn* contributes to the improvement of what is being evaluated by identifying the strengths as well as the weaknesses of the didactic use of rubrics in the assessment of university learning. The book also provides a set of theoretical issues, methodological elements, and practical resources for the assessment of university learning using rubrics. Covering topics such as active learning, self assessment, and teacher identity, this reference work is ideal for administrators, policymakers, researchers, scholars, academicians, practitioners, educators, and students.

Assessing Disciplinary Writing in Both Research and Practice

Wright, Katherine Landau, Hodges, Tracey S., 2023-08-01 *Assessing Disciplinary Writing in Both Research and Practice* tackles the challenge of measuring writing skills in specific content areas which is crucial for preparing students to communicate as field experts and for their future careers Edited by Katherine Wright Associate Professor of Literacy and Language at Boise State University and Tracey Hodges Founder and Lead Consultant of The Empowering Advocate this book provides solutions by bringing together validated measures and practical assessment strategies that can be used in both research and instruction The book's theoretical foundations cover multimodal disciplinary writing assessing disciplinary writing versus content area writing and using assessment as a tool for disciplinary writing instruction Practical methods for assessing writing in social studies science mathematics English and language arts and other genres at the elementary middle and high school levels are included as well as assessment strategies for specific populations of students such as undergraduate students English learners gifted and talented students special needs students and incarcerated students This highly valued reference is essential for academic scholars K12 teachers and educational researchers who want to improve writing instruction and research in content and discipline specific areas By providing validated measures and methods for assessing disciplinary writing this edited book helps bridge the gap between research and practice and enables practitioners to better measure student growth and improve writing instruction This publication is the first step towards advancing research and improving writing instruction in content and discipline specific areas
