*Distributed Autonomous Robotic Systems* 7 Maria Gini, Richard Voyles, 2007-06-10 The goal of the 8th Symposium on Distributed Autonomous Robotic Systems DARS is to exchange and stimulate research ideas to realize advanced distributed robotic systems. Technologies, algorithms and system architectures will be presented and discussed during the symposium. DARS 2006 builds upon past successes and provides an exciting environment for researchers to present and discuss their novel theoretical results, implementations and applications. DARS successfully took place in 1992, 1994 and 1996 in Japan, Riken Wako in 1998 in Germany, Karlsruhe in 2000 in Knoxville, Tennessee, USA in 2002 at Fukuoka, Japan and in 2004 at LAAS in Toulouse, France. DARS 2006 will be held in the Minneapolis campus of the University of Minnesota in the Electrical Engineering and Computer Science building. A total of 42 technical papers were submitted by authors from multiple countries. All the submissions were rigorously reviewed by the Program Committee. Of those submissions, 24 were accepted. The overall outcome of the revision process is an excellent selection of papers that showcase the research in distributed autonomous robotics today. We would like to take this opportunity to thank everyone involved with the organization of DARS 2006. First we would like to thank the members of the Program Committee who did a thorough and conscientious job in reviewing a large number of papers. The members of the Advisory Committee provided invaluable help and support throughout the process of organizing the conference. We warmly welcome all representatives from industry, government and academia joining us in Minneapolis in July 2006.
