**Pseudoscience and Science Fiction** Andrew May, 2016-09-13 Aliens flying saucers ESP the Bermuda Triangle antigravity are we talking about science fiction or pseudoscience Sometimes it is difficult to tell the difference Both pseudoscience and science fiction SF are creative endeavours that have little in common with academic science beyond the superficial trappings of jargon and subject matter The most obvious difference between the two is that pseudoscience is presented as fact not fiction Yet like SF and unlike real science pseudoscience is driven by a desire to please an audience in this case people who want to believe This has led to significant cross fertilization between the two disciplines SF authors often draw on real pseudoscientific theories to add verisimilitude to their stories while on other occasions pseudoscience takes its cue from SF the symbiotic relationship between ufology and Hollywood being a prime example of this This engagingly written well researched and richly illustrated text explores a wide range of intriguing similarities and differences between pseudoscience and the fictional science found in SF Andrew May has a degree in Natural Sciences from Cambridge University and a PhD in astrophysics from Manchester University After many years in academia and the private sector he now works as a freelance writer and scientific consultant He has written pocket biographies of Newton and Einstein as well as contributing to a number of popular science books He has a lifelong interest in science fiction and has had several articles published in Fortean Times magazine
