second investigates the staying power of biological analogies the third explores the paradoxical imaginary of analogous cities as a means of integrating contemporary architecture with heritage contexts while the fourth unpacks the critical and theoretical potential of linguistic metaphors and visual comparisons in architectural discourse Comparing views on the role of analogies and metaphors by prominent voices in architecture and related disciplines from the 17th century to the present the book shows how the analogical world of the project is revealed as a wide open field of creative and cognitive interactions These visual and textual operations are explained through 36 analogical plates which can be read as an inter text demonstrating how analogy has the power to reconcile design and theories *Art Libraries Journal* ,1996 *Montréal en évolution* Jean Claude Marsan,1994 **Inventaire des bâtiments construits entre 1919 et 1959 dans le vieux Montréal et les quartiers Saint-Georges et Saint-André** Robert A.
