**Tools for Structured and Object-oriented Design** Marilyn Bohl, Maria Rynn, 2008 This text offers a concept oriented against an example oriented approach with many step by step examples that support the concepts It adds a new chapter that explores object oriented programming concepts in a language independent manner      *Handbook of Logic in Artificial Intelligence and Logic Programming: Volume 5: Logic Programming* Dov M. Gabbay, C. J. Hogger, J. A. Robinson, 1998-01-08 The Handbook of Logic in Artificial Intelligence and Logic Programming is a multi volume work covering all major areas of the application of logic to artificial intelligence and logic programming The authors are chosen on an international basis and are leaders in the fields covered Volume 5 is the last in this well regarded series Logic is now widely recognized as one of the foundational disciplines of computing It has found applications in virtually all aspects of the subject from software and hardware engineering to programming languages and artificial intelligence In response to the growing need for an in depth survey of these applications the Handbook of Logic in Artificial Intelligence and its companion the Handbook of Logic in Computer Science have been created The Handbooks are a combination of authoritative exposition comprehensive survey and fundamental research exploring the underlying themes in the various areas Some mathematical background is assumed and much of the material will be of interest to logicians and mathematicians Volume 5 focuses particularly on logic programming The chapters which in many cases are of monograph length and scope emphasize possible unifying themes

**Logic Program Synthesis and Transformation - Meta-Programming in Logic** Laurent Fribourg, Franco Turini, 1994-11-30 This volume constitutes the combined proceedings of the 4th International Workshops on Logic Program Synthesis and Transformation LOPSTR 94 and on Meta Programming META 94 held jointly in Pisa Italy in June 1994 This book includes thoroughly revised versions of the best papers presented at both workshops The main topics addressed by the META papers are language extensions in support of meta logic semantics of meta logic implementation of meta logic features performance of meta logic and several applicational aspects The LOPSTR papers are devoted to unfolding folding partial deduction proofs as programs inductive logic programming automated program verification specification and programming methodologies      *Logic Programming* I. Balbin, K. Lecot, 2012-12-06 Logic Programming was effectively defined as a discipline in the early seventies It is only during the early to mid eighties that books conferences and journals devoted entirely to Logic Programming began to appear Consequently much of the work done during this first crucial decade in Marseilles Edinburgh London Budapest and Stockholm to name a few is often overlooked or difficult to trace There are now

two main regular conferences on Logic Programming and at least five journals The Journal of Logic Programming New Generation Computing Automated Reasoning The Journal of Symbolic Computation and Future Generation Computer Systems Logic Programming however has its roots in Automated Theorem Proving and via the expanding area of expert systems strongly influences researchers in such varied fields as Civil Engineering Chemistry Law etc Consequently many papers related to Logic Programming appear in a wide variety of journals and proceedings of conferences in other disciplines This is particularly true of Computer Science where a revolution is taking place in hardware design programming languages and more recently databases One cannot overestimate the importance of such a bibliography Tools for Structured Design Marilyn Bohl, Maria Rynn, 2001 The author's objective is to analyze a problem and express its solution in such a way that the computer can be directed to follow the problem solving procedure Emphasis is placed on maintaining an overall structure in program design and pseudo code is shown as an alternative or supplement to flow charting Analyzing techniques of top down modular program development fosters the reader's inquisitiveness In this fifth edition much new information has been added including a new chapter on modularization This book will easily fit as the core text for any course covering programming logic and design or structured programming *Proceedings of the 4th International Conference on Electrical and Information Technologies for Rail Transportation (EITRT) 2019* Limin Jia, Yong Qin, Baoming Liu, Zhigang Liu, Lijun Diao, Min An, 2020-04-07 This book reflects the latest research trends methods and experimental results in the field of electrical and information technologies for rail transportation which covers abundant state of the art research theories and ideas As a vital field of research that is highly relevant to current developments in a number of technological domains the subjects it covered include intelligent computing information processing Communication Technology Automatic Control etc The objective of the proceedings is to provide a major interdisciplinary forum for researchers engineers academicians as well as industrial professionals to present the most innovative research and development in the field of rail transportation electrical and information technologies Engineers and researchers in academia industry and the government will also explore an insight view of the solutions that combine ideas from multiple disciplines in this field The volumes serve as an excellent reference work for researchers and graduate students working on rail transportation electrical and information technologies
