

Intro to Sociology

The Presentation of Self

- ★ According to sociologists, when we come into contact with others:
 - We form impressions of others and manage impressions of ourselves at the same time (i.e., **impression formation**)
 - Physical appearance → attractive vs. unattractive
 - Clothing, grooming, height, and weight (e.g., overweight being stereotyped as lacking willpower)
 - Those who are considered unattractive can be perceived as untrustable, un-intelligent, etc.
 - Those who are seen as attractive can be seen as responsible, trustworthy, intelligent, etc.
 - This is the major one; it is so obvious and simple, but so complex in terms of its meaning.
 - ★ Verbal cues (e.g., accent, word choice, etc.) and non-verbal cues (e.g., posture, gestures, facial expressions, etc.)
 - ★ Social group membership → (e.g., people's gender, race, sex, age, and ethnicity.)
- ★ *The Presentation of Self in Everyday Life* by Erving Goffman (1959)
 - **Impression management** → Performances by which people attempt to present a favorable public image of themselves to their audience
 - How we carry ourselves, and how we present ourselves politically
 - What we learn is how to look, what to say, when to say it
 - We know what we have to do to manage our impression in the eyes of others to appear favorable
 - The primary goal is to increase the likelihood of obtaining favorable outcomes.
 - Job interviews
 - Meeting a significant other's family
 - Any kind of formal event where there is a specific dress code (ex: weddings, parties)

Goffman and Dramaturgy— continued (2)

- ★ **Dramaturgy** is the study of social life as theatre
 - **Front stage** → performance takes place in front of an audience – you have your script (what to say) and props (physical objects or other people used.)

Structure And Process Rdgs In Intro Sociol:

Essential Readings in Health Behavior Mark Edberg, 2010-10-22 *Health Behavior Education Promotion Human Behavior in the Social Environment* Irl Carter, 2017-07-12 Since the publication of the first edition of *Human Behavior in the Social Environment* several generations of students have successfully used this classic text which takes a social systems approach to human behavior. This systems approach is still widely accepted in the human services disciplines including social work, education, nursing, psychology, and in human services programs themselves. Its ideas have become the organizing framework for curriculum as well as fruitful sources for new applications of theory and practice. Among the advantages of the social systems approach is that it permits students and practitioners to see connections between fields of practice, between methods, and across professional disciplines and bodies of theory. The book serves as a template of the concentric circles of human behavior with chapters on fields of behavior beginning with the person and ranging outward to culture and society. Abundant examples from practice and from behavioral patterns are drawn from the social sciences, topical events, literature, and the authors' personal and professional experiences. This volume responds to the needs of students and instructors as these have developed since the publication of the previous edition.

Readings in Human-Computer Interaction Ronald M. Baecker, 2014-06-28 The effectiveness of the user-computer interface has become increasingly important as computer systems have become useful tools for persons not trained in computer science. In fact, the interface is often the most important factor in the success or failure of any computer system. Dealing with the numerous subtly interrelated issues and technical, behavioral, and aesthetic considerations consumes a large and increasing share of development time, and a corresponding percentage of the total code for any given application. A revision of one of the most successful books on human-computer interaction, this compilation gives students, researchers, and practitioners an overview of the significant concepts and results in the field and a comprehensive guide to the research literature. Like the first edition, this book combines reprints of key research papers and case studies with synthesizing survey material and analysis by the editors. It is significantly reorganized, updated, and enhanced; over 90% of the papers are new. An invaluable resource for systems designers, cognitive scientists, computer scientists, managers, and anyone concerned with the effectiveness of user-computer interfaces, it is also designed for use as a primary or supplementary text for graduate and advanced undergraduate courses in human-computer interaction and interface design.

Human-computer interaction: historical, intellectual, and social Developing interactive systems including design, evaluation methods, and development tools. The interaction experience through a variety of sensory modalities including vision, touch, gesture, audition, speech, and language. Theories of information processing and issues of human-computer fit and adaptation.

Readings in Sociology Lorne Tepperman, James E. Curtis, 1988 *Introduction to Infrastructure* Michael R. Penn, Philip J. Parker, 2011-12-13 *Introduction to Infrastructure* An Introduction to Civil and Environmental Engineering breaks new ground in preparing civil and environmental engineers to meet the challenges of the

21st century The authors use the infrastructure that is all around us to introduce students to civil and environmental engineering demonstrating how all the parts of civil and environmental engineering are interrelated to help students see the big picture in the first or second year of the curriculum Students learn not only the what of the infrastructure but also the how and the why of the infrastructure Readers learn the infrastructure is a system of interrelated physical components and how those components affect and are affected by society politics economics and the environment Studying infrastructure allows educators and students to develop a valuable link between fundamental knowledge and the ability to apply that knowledge so students may translate their knowledge to new contexts The authors implementation of modern learning pedagogy learning objectives concrete examples and cases and hundreds of photos and illustrations and chapters that map well to the ABET accreditation requirements AND the ASCE Civil Engineering Body of Knowledge 2nd edition with recommendations for using this text in a 1 2 or 3 hour course make this text a key part of any civil and or environmental engineering curriculum
