Structures Of Knowing:

Understanding Matrix Structures and their Alternatives William G. Egelhoff, Joachim Wolf, 2017-03-27 This book describes the use of matrix structures in large complex organizations such as MNCs. Using an information processing perspective of organization design, it develops a more comprehensive theory for fitting the structural configurations of matrix structures to key characteristics of firm strategy. Empirical research by the authors supports this theoretical framework. In addition to structural configuration, *Understanding Matrix Structures* identifies and develops the mode of decision making within a matrix as an important second dimension of matrix structure design. It can be either balanced joint decision making by the two dimensions of a matrix or rule based decision making where rules pre-assign certain decisions to one dimension or the other for unitary decision making. Recent exploratory research by the authors supports this conceptual framework and provides the potential to create a more flexible matrix structure one that facilitates a more ambidextrous organization.

Language, Mind, and Art D. Jamieson, 2013-03-09 This book is a collection of essays in honor of Paul Ziff written by his colleagues, students, and friends. Many of the authors address topics that Ziff has discussed in his writings: understanding rules and regularities, proper names, the feelings of machines, expression and aesthetic experience. Paul Ziff began his professional career as an artist, went on to study painting with J. M. Hanson at Cornell and then studied for the Ph.D. in philosophy also at Cornell with Max Black. Over the next three decades he produced a series of remarkable papers in philosophy of art culminating in 1984 with the publication of *Antiaesthetics: An Appreciation of the Cow with the Subtile Nose*. In 1960 he published *Semantic Analysis* his masterwork in philosophy of language. Throughout his career he made important contributions to philosophy of mind in such papers as *The Simplicity of Other Minds* 1965 and *About Behaviourism* 1958. In addition to his work in these areas his lectures at Harvard on philosophy of religion are an underground classic and throughout his career he has continued to make art and to search for the meaning of life in the properties of prime numbers. Although his interests are wide and deep, questions about language, art, and mind have dominated his philosophical work and it is problems in these areas that provide the topics of most of the essays in this volume.
