Student Power:

Equal Educational Opportunity United States. Congress. Senate. Select Committee on Equal Educational Opportunity, 1970 **Higher Education and the Student** Robert Troschitz, 2017-05-08 As one of the pioneers and leading advocates of neoliberalism Britain and in particular England has radically transformed its higher education system in recent decades What was once a public good has turned into a market in which universities are required to perform like businesses with students being increasingly referred to as customers The Idea of Higher Education and the Student investigates precisely this relation between the changing function of higher education and how we see the student But instead of offering yet another critique of neoliberalism and marketisation it widens the view beyond the present Equal Educational Opportunity 1971 ,1971 **When Students Protest** Judith Bessant, Analicia Mejia Mesinas, Sarah Pickard, 2021-07-29 Student political action has been a major and recurring feature of politics across the globe through the past century Students have been involved in a full range of public issues from anti colonial movements anti war campaigns civil rights and pro democracy movements to campaigns against neoliberal policies austerity racism misogyny and calls for climate change action Yet student actions are frequently dismissed by political elites and others as adolescent mischief or manipulation of young people by duplicitous adults This occurs even as many working in governments traditional media and educational organisations attempt to suppress student movements Much of mainstream scholarly work has also deemed student politics as undeserving of intellectual attention These three edited volumes of books help set the record straight Written by scholars and activists from around the world When Students Protest Universities in the Global South is the second in a three volume study that explores university student politics in the global south The authors document and analyse how generations of university and college students in the Global South responded to issues such as problems in their own universities as well as standing up against violent military dictatorships human rights abuses oppressive poverty foreign interference and the effects of neoliberal austerity regimes Contributors to this this volume also reveal repeated moves by states and institutions to stigmatise and suppress student political action while highlighting how those students developed new kinds of political action further demonstrating why this rich and complex global phenomena is worthy of more attention **Hearings, Reports and Prints of the Senate Select Committee on Equal Educational Opportunity** United States.
