Sursum Corda! Malcolm Lowry,1995 *The Making of Malcolm Lowry's Under the Volcano* Frederick Asals,1997 Ten years in the making Under the Volcano is the best known work of writer Malcolm Lowry Published first in 1947 it is a brilliant moving and complex novel perhaps the last fictional masterpiece to emerge from the modernist movement As the years went by Lowry s obsessive rewriting took him further and further into his book which changed relatively little in the outer semblance of action and main characters but became utterly transformed in texture from the thin and mediocre version of 1940 to the rich tapestry of 1947 The numerous manuscripts allow a look at the processes by which Lowry created not only his masterwork but also his own reputation as a modernist genius This study offers an extended examination of individual drafts as the novel slowly developed and in a final chapter an appraisal of the implications of Lowry s revisions for the book as published an appraisal that suggests bases for new readings of Under the Volcano *Sursum Corda!: 1926-1946* Malcolm Lowry,1995 Malcolm Lowry author of Under the Volcano and one of the most celebrated English novelists of this century was also a writer of superb letters Collected here for the first time are close to 800 letters spanning more than thirty years most of them never before published and all of them carefully annotated Lowry s letters range from his detailed erudite 35 page long exegesis of his masterpiece to impassioned letters and notes to his wives They include witty ironic self parodies letters to younger writers full of generous advice and literary discussion and letters with analysis and acute insight into politics and current affairs Lowry frequently illustrated his letters with drawings marginal sketches and symbols of good cheer such as his seagulls which adorn many of the later letters These illustrations have been reproduced in both volumes of The Collected Letters of Malcolm Lowry together with many photographs of Lowry and his correspondents and reproductions of interesting holograph letters ***Sursum Corda!: 1947-1957*** Malcolm Lowry,1995 *Reading Matters* Joseph

Tabbi,Michael Wutz,2018-05-31 The convergence of twentieth century narrative and technology is one of the most important developments in current literary study A decade after the founding of the Society for Literature and Science and the appearance of such influential books as Kathleen Woodward s Culture of Information and William Paulson s The Noise of Culture Joseph Tabbi and Michael Wutz have edited a landmark volume to summarize this still emerging field Twelve original essays and the editors introductory overview show how these theoretical concerns can contribute to the practical study of narrative Reading Matters covers the range of contemporary literature from the canonical novels of high modernism and postmodernism through subjects new to the academic agenda such as cyberpunk and hypertext fiction In an age that has proclaimed the death of the novel many times over the contributors argue persuasively for the continued vitality of literary narrative By responding in ingenious ways to the capabilities of other media they assert the novel has enlarged and redefined its territory of representation and its range of techniques and play while maintaining its viability in the new media assemblage ***Rewriting/Reprising in Literature*** Claude Maisonnat,Josiane Paccaud-Huguet,Annie Ramel,2009-10-02

This volume includes a series of 17 selected essays preceded by a methodological introduction whose purpose is to offer a fresh outlook on the question of rewriting/revising. The argument taking for granted the phenomenon of intertextuality develops along three main axes: the first one reconsiders the already debated issue of authority on post-structuralist premises, arguing that the origin of a text is untraceable; the second looks at a phenomenon often associated with revising, especially in a post-colonial context: trauma, whether individual or historical, in relation to creative repetition; the third axis offers a re-reading of the question of voice, introducing the notion of the textual voice understood as that part of the enunciative act over which the author has no control. When writers make of revising a deliberate practise, we are tempted to believe that their position between homage and pillage presupposes the existence of a traceable source of the literary Word. We must however face the problematic nature of enunciation, the void on which it is founded. Which leads us to the proposition that the act of revising is a creation *ex nihilo*, a certain mode of organisation around that void. Besides, in a century of major man-made traumas whose effect was the tearing up of social fabrics, revising will assume a more complex significance: the symptomatic repetitive stitching of what is being constantly ripped up.

Think to New Worlds Joshua Blu Buhs, 2024-07-03

How a writer who investigated scientific anomalies inspired a factious movement and made a lasting impact on American culture. Flying saucers, Bigfoot, Frogs raining from the sky. Such phenomena fascinated Charles Fort, the maverick writer who scanned newspapers, journals, and magazines for reports of bizarre occurrences: dogs that talked, vampires, strange visions in the sky, and paranormal activity. His books of anomalies advanced a philosophy that saw science as a small part of a larger system in which truth and falsehood continually transformed into one another. His work found a ragged following of skeptics who questioned not only science but the press, medicine, and politics. Though their worldviews varied, they shared compelling questions about genius, reality, and authority. At the center of this community was adman, writer, and enfant terrible, Tiffany Thayer, who founded the Fortean Society and ran it for almost three decades, collecting and reporting on every manner of oddity and conspiracy. In *Think to New Worlds*, Joshua Blu Buhs argues that the Fortean effect on modern culture is deeper than you think. Fort's descendants provided tools to expand the imagination, explore the social order, and demonstrate how power is exercised. Science fiction writers put these ideas to work as they sought to uncover the hidden structures undergirding reality. Avant-garde modernists including the authors William Gaddis, Henry Miller, and Ezra Pound, as well as Surrealist visual artists, were inspired by Fort's writing about metaphysical and historical forces. And in the years following World War II, flying saucer enthusiasts, convinced of alien life, raised questions about who controlled the universe. Buhs's meticulous and entertaining book takes a respectful look at a cast of oddballs and eccentrics, plucking them from history's margins and spotlighting their mark on American modernism. *Think to New Worlds* is a timely consideration of a group united not only by conspiracies and mistrust of science but by their place in an ever-expanding universe rich with unexplained occurrences and visionary possibilities.
