The Survey, 1951 Counting Religion in Britain, 1970-2020 Clive D. Field, 2021-12-09 Counting Religion in Britain 1970-2020 the fourth volume in the author's chronological history of British secularization sheds significant new light on the nature scale and timing of religious change in Britain during the past half century with particular reference to quantitative sources Adopting a key performance indicators approach twenty one facets of personal religious belonging behaving and believing are examined offering a much wider range of lenses through which the health of religion can be viewed and appraised than most contemporary scholarship Summative analysis of these indicators by means of a secularization dashboard leads to a reaffirmation of the validity of secularization in its descriptive sense as the dominant narrative and direction of travel since 1970 while acknowledging that it is an incomplete process and without endorsing all aspects of the paradigmatic expression of secularization as a by product of modernization
