## **Surviving Extremes Ice Jungle Sand And Swamp:**

Surviving Extremes Nick Middleton, 2012-08-23 A brilliant read that illustrated the strong will and determination of man in the face of everything that nature had to throw at us Wanderlust Nick Middleton the intrepid Oxford don explorer and author of *Going to Extremes* is back and he's set himself a challenge to cope with the worst that nature can throw at him in *Surviving Extremes* Travelling to four of the most extreme natural environments swamps deserts jungles and arctic wastelands the question is can he pick up enough tips from the indigenous people to hack it at the very edge of human existence or will his mid latitude sensibilities forever let him down This is Nick's account of how he had to put his body and mind to the test in a unique survival experiment *Surviving Extremes* Nicholas J. Middleton, 2004 **Swamp** Anthony Wilson, 2017-11-15 Throughout history swamps have been idealized and demonized purged and protected Today they are simultaneously considered metaphorical places of evil pestilence and death and treasured as diverse biological ecosystems teeming with life Covering not only swamps and bogs but also marshes and wetlands *Swamp* ventures into the cultural and ecological histories of these mysterious mythologized and misunderstood landscapes Anthony Wilson takes readers into swamps across the globe from the freshwater marshes of Botswana's tremendous Okavango delta to the notable swamps between the Tigris and Euphrates rivers to the peat bogs in Russia the British Isles and Scandinavia which have been used as energy sources for centuries It explores ideas and representations of wetlands across centuries cultures and continents considering legend and folklore mythology literature film and natural and cultural history As it plumbs the murky depths of swamps from the distant past to an uncertain future *Swamps* provides an engaging accessible informative and lavishly illustrated journey into these fascinating landscapes **Going to Extremes** Nick Middleton, 2012-08-09 In *Going to Extremes* writer presenter and Oxford geography don Nick Middleton visits Oymyakon in Siberia where the average winter temperature is 47 degrees and 40% of the population have lost their fingers to frostbite while changing the car wheel Next he travels to Arica Chile where there have been fourteen consecutive years without a drop of rain and so fog is people's only source of water Going from the driest to the wettest he visits Mawsynram in India which annually competes for the title with its neighbour Cherrapunji However Nick discovers even here that during the dry season there is water shortage and one entrepreneur has started selling it bottled Finally his journey takes him to Dalol in Ethiopia known as the hell hole of creation where the temperature remains at 94 degrees year round Here Nick will join miners who work all day with no shade limited water and no protective clothing The book and series consider how and why people live in these harsh environments How does Nick's body react to these contrasting extremes He looks at the geographical and meteorological conditions He meets local characters and discovers the history of these settlements to find out how they ever became populated He looks at the way both the population and the flora and fauna have adapted physically to the climate and also considers the psychological impact of living under such conditions Extremes Nick Middleton, 2015-03-10 Humans have a remarkable knack for

surviving harsh environments But how do people really endure the world s most remote and inhospitable landscapes where nature still reigns and where the physical geography is raw and unforgiving In *Extremes* renowned geographer and travel writer Nick Middleton puts his body and mind to the test in an attempt to find the answer His mission is to learn how to cope with four especially horrendous habitats Through arctic wasteland jungle desert and swamp Nick pits himself against the elements and explains the geographical conditions that conspire to produce the world s harshest ecologies He also discovers the various human quirks that people have evolved to make life at the edge bearable In northern Greenland Nick joins a group of Inuits hunting for narwhal crucial to the group s survival on the edge of fragile sea ice while in the jungle he ventures into Congo s tropical forest home of the Biaka pygmies He joins the annual crossing of the Tenere desert by the women of the Tubu tribe to collect dates and then travels to Papua one of the least explored places on earth to find the Kombai people a remote group of tree house dwellers above the Asmat region s flood plain *Extremes* is Nick Middleton s amazing account of four of the most unwelcoming environments on earth Can he pick up enough tips from the indigenous people of these locations to hack it at the very edge of human existence or will his mid latitude sensibilities forever let him down
