**Documents and Their Scientific Examination** Charles Ainsworth Mitchell,1922 From the PREFACE THE scientific examination of documents as a branch of forensic chemistry has been strangely neglected and hitherto there has been no work dealing fully with the subject from all points of view The present book is based upon personal experience extending over many years and includes the results of a great variety of investigations on such subjects as the composition and behavior of inks pencil pigments sealing wax and other writing materials in connection with their use upon documents Some of these results have been communicated to scientific societies and subsequently published in their journals and so have had the advantage of being discussed and criticized by experts in the respective subjects The questions of the materials upon which the writing typing or printing appears of handwriting of finger prints photography and microscopical examination are all inseparably connected with the scientific examination of documents and these I have dealt with in due proportion to the whole subject bearing in mind works already available For the purpose of presenting expert evidence in legal cases criminal charges the investigation of anonymous letters and the like such studies are of material importance and as little information on the chemical questions involved was available I had to make prolonged laboratory experiments to obtain trustworthy results and these records should prove of service to others In connection with the chemical examination of documents I am

privileged to make use of numerous details of cases and observations recorded by Mr A Lucas Director of the Government Laboratory Cairo whose excellent work on Forensic Chemistry contains short sections on the subject My best thanks are also due to Mr A E Osborn of New York for valuable information kindly sent to me and for several illustrations as well as for permission to quote from his standard work *Questioned Documents* *The Scientific Examination of Documents* David Ellen,1989 **Bibliography on Economic and Scientific Proof** American Bar Association.
