**Violence, Victimisation and Young People** Ylva Odenbring, Thomas Johansson, 2021-07-08 This edited collection focuses on different aspects of everyday violence harassment and threats in schools It presents a number of in depth studies of everyday life in schools and uses examples and case studies from different countries to fuel a discussion on national differences and similarities The book discusses a broad range of concepts findings and issues under the umbrella of three main themes 1 Power relations homosociality and violence 2 Sexualized violence and schooling and 3 Everyday racism segregation and schooling Specific topics include sexuality policing bullying sexting homophobia and online rape culture The school is young people's central workplace and therefore of great importance to students general feeling of wellbeing safety and security However there is no place where youth are at greater risk of being exposed to harassment and violations than at school and on their way to and from school Threats are a relatively common experience among school students but some aspects of these mundane and frequent harassments and violations are not taken seriously and are therefore not reported Harassment

and violations often have negative effects on youth and children and increase their risks of such adverse outcomes as school dropout drug use and criminal behaviour Contemporary research has shown that gender is of great importance to how students handle and report or do not report various violent situations Studies have also revealed how the notions of masculinity and of being a victim can be conflicting identities and affect how students handle situations of threat violence and harassment The importance of gender is also particularly evident with regard to sexual harassment Female students generally report greater exposure to sexual harassment than male students do
