The committee also discusses issues of environmental enrichment such as opportunities for foraging. Based on the world's scientific literature and input from authoritative sources, the book provides best estimates of nutrient requirements. The volume covers requirements for energy, carbohydrates, including the role of dietary fiber, proteins and amino acids, fats and fatty acids, minerals, fat-soluble and water-soluble vitamins, and water. The book also analyzes the composition of important foods and feed ingredients and offers guidelines on feed processing and diet formulation
