Leading researchers survey the main theories of information structure in syntax, phonology and semantics as well as perspectives from psycholinguistics and other relevant fields. Following the editors' introduction, the book is divided into four parts. The first on theories of and theoretical perspectives on information structure includes chapters on topic, prosody and implicature. Part 2 covers a range of current issues in the field including focus, quantification and sign languages while Part 3 is concerned with experimental approaches to information structure including processes involved in its acquisition and comprehension. The final part contains a series of linguistic case studies drawn from a wide variety of the world's language families. This volume will be the standard guide to current work in information structure and a major point of departure for future research.
