Hoggan, 2014-01-03 Advances in Quantum Chemistry presents surveys of current topics in this rapidly developing field that has emerged at the cross section of the historically established areas of mathematics physics chemistry and biology It features detailed reviews written by leading international researchers This volume focuses on the theory of heavy ion physics in medicine Advances in Quantum Chemistry presents surveys of current topics in this rapidly developing field and this volume focuses on the theory of heavy ion physics in medicine

Electronic Structure Methods for Complex Materials Wai-Yim Ching, Paul Rulis, 2012-05-17 Density functional theory DFT has blossomed in the past few decades into a powerful tool that is used by experimentalists and theoreticians alike This book highlights the extensive contributions that the DFT based OLCAO method has made to progress in this field and it demonstrates its competitiveness for performing ab initio calculations on large and complex models of practical systems A brief historical account and introduction to the elements of the theory set the stage for discussions on semiconductors insulators crystalline metals and alloys complex crystals non crystalline solids and liquids microstructure containing systems and those containing impurities defects and surfaces biomolecular systems and the technique of ab initio core level spectroscopy calculation

The Total Safety Factor Method for Tunnel Support Structure Design Mingqing Xiao, 2025-12-01 The Total Safety Factor Method for Tunnel Support Structure Design systematically discusses the entire process of mining tunnel design including analysis of surrounding rock self stability identification of local support and system support calculation of rock pressure design value load structure model and total safety factor calculation method of multi layer support structure deformation calculation method of support structure integrated design method of support strength deformation timing and the dynamic adjustment method based on on site deformation monitoring It also presents the inspection and verification tests of total safety factor method and specific engineering application cases The theoretical system of total safety factor method described in this book has broken through the design bottleneck of tunnel support structures that have long relied on engineering analogy methods The The Total Safety Factor Method provides the basic theoretical guidance for the quantitative design dynamic adjustment and intelligent construction of mining tunnel support structures The book is based on the many years of experience of the team led by the author of this book Xiao Mingqing Professor Ming s team has been involved in the design of nearly 20% of the high speed railway tunnels and 50% of large diameter underwater shield tunnels in China with a total design mileage of 4 000km Provides information on the theories and specific algorithms of the total safety factor method for the design of tunnel support structures and the quantitative design method of tunnel support structures Countries around the world have significant differences in their quantitative design methods of mining tunnel support structures and secondary support bearing bodies This book establishes and presents a unified view of various design concepts Helps readers to compare and

select tunnel section shapes and different support schemes and quantify the design of support stiffness support deformation and support timing to achieve the most economical and safest design by using the total safety factor method
