Favorskaya,2020-04-20 This book gathers selected papers presented at the conference Advances in 3D Image and Graphics Representation Analysis Computing and Information Technology one of the first initiatives devoted to the problems of 3D imaging in all contemporary scientific and application areas The aim of the conference was to establish a platform for experts to combine their efforts and share their ideas in the related areas in order to promote and accelerate future development This second volume discusses algorithms and applications focusing mainly on the following topics 3D printing technologies naked dynamic and auxiliary 3D displays VR AR MR devices VR camera technologies microprocessors for 3D data processing advanced 3D computing systems 3D data storage technologies 3D data networks and technologies 3D data intelligent processing 3D data cryptography and security 3D visual quality estimation and measurement and 3D decision support and information systems

Designing, Engineering, and Analyzing Reliable and Efficient Software Singh, Hardeep,2013-02-28 Due to the role of software systems in safety critical applications and in the satisfaction of customers and organizations the development of efficient software engineering is essential Designing Engineering and Analyzing Reliable and Efficient Software discusses and analyzes various designs systems and advancements in software engineering With its coverage on the integration of mathematics computer science and practices in engineering this book highlights the importance of ensuring and maintaining reliable software and is an essential resource for practitioners professors and students in these fields of study

Proceedings of the 2022 International Conference on Bigdata Blockchain and Economy Management (ICBBEM 2022) Daowen Qiu,Yusheng Jiao,William Yeoh,2022-12-28 This is an open access book As a leading role in the global megatrend of scientific innovation China has been creating a more and more open environment for scientific innovation increasing the depth and breadth of academic

cooperation and building a community of innovation that benefits all. These endeavors have made new contribution to globalization and creating a community of shared future. With the rapid development of modern economic society in the process of economic management informatization has become the mainstream of economic development in the future. At the same time with the emergence of advanced management technologies such as blockchain technology and big data technology real market information can be quickly obtained in the process of economic management which greatly reduces the operating costs of the market economy and effectively enhances the management level of operators thus contributing to the sustained rapid and healthy development of the market economy. Under the new situation the innovative application of economic management research is of great practical significance. 2022 International Conference on Bigdata Blockchain and Economic Management ICBBEM 2022 will be held on March 25-27, 2022 in Wuhan, China. ICBBEM 2022 will focus on the latest fields of Bigdata Blockchain and Economic Management to provide an international platform for experts, professors, scholars, and engineers from universities, scientific institutes, enterprises, and government affiliated institutions at home and abroad to share experiences to expand professional fields to exchange new ideas face to face to present research results and to discuss the key challenging issues and research directions facing the development of this field with a view to promoting the development and application of theories and technologies in universities and enterprises.

DeepSeek in Action Jing Dai, 2025-11-18. From fundamental concepts to advanced implementations, this book thoroughly explores the DeepSeek V3 model focusing on its Transformer based architecture, technological innovations, and applications. The book begins with a thorough examination of theoretical foundations including self attention, positional encoding, the Mixture of Experts mechanism, and distributed training strategies. It then explores DeepSeek V3's technical advancements including sparse attention mechanisms, FP8 mixed precision training, and hierarchical load balancing which optimize memory and energy efficiency. Through case studies and API integration techniques, the model's high performance capabilities in text generation, mathematical reasoning, and code completion are examined. The book highlights DeepSeek's open platform and covers secure API authentication, concurrency strategies, and real time data processing for scalable AI applications. Additionally, the book addresses industry applications such as chat client development utilizing DeepSeek's context caching and callback functions for automation and predictive maintenance. This book is aimed primarily at AI researchers and developers working on large scale AI models. It is an invaluable resource for professionals seeking to understand the theoretical underpinnings and practical implementation of advanced AI systems particularly those interested in efficient scalable applications.

The Software Life Cycle Darrel Ince, Derek Andrews, 2014-05-20. The Software Life Cycle deals with the software lifecycle that is what exactly happens when software is developed. Topics covered include aspects of software engineering, structured techniques of software development and software project management. The use of mathematics to design and develop computer systems is also discussed. This book is comprised of 20 chapters divided into four sections and begins with an

overview of software engineering and software development paying particular attention to the birth of software engineering and the introduction of formal methods of software development The next section explores some aspects of software engineering that tend to get ignored in the literature including functional programming functional programming languages and relational databases The reader is then introduced to structured methods of software development along with software project management The final chapter is devoted to software testing which can be functional or nonfunctional This monograph will be useful to software engineers and designers Logic and Structured Design for Computer Programmers Harold J. Rood,1992 This book is written as an introduction to the logic of data processing for those who have not begun to study programming and have little background in mathematics or logic The text addresses logical problems common to many programming languages and offers a variety of logic and design tools with a variety of applications Students who complete a course based on this text should understand the logic of programming be able to specify the logic for moderately complex programs and be able to concentrate on the features of a particular language and then apply that language to implement program solutions **Data Processing Digest** ,1988 *The Resource Information System* B.
