Surreptitious Printing in England, 1550-1640 Denis B. Woodfield, 1973 London's News Press and the Thirty Years War Jayne E. E. Boys, 2014 A topical subject offering interesting parallels between the news revolution in the age of James I and Charles I and our internet age An important contribution to the history of print and books London's News Press shows that seventeenth century England was very much part of a European wide news community The book presents a new print history that looks across Europe and the interconnecting political and religious groups with international networks It tells the story of the printers and publishers engaged in the earliest illicit publications their sources and connections in Germany as well as the Netherlands and traces the way legitimacy was achieved These were the earliest printed periodical news publications Periodicity and its implications for trade and customers is explored as well as the roles of publishers and editors The period saw a much bigger circulation of news than had ever been experienced before The book also describes the lively nature of relationships that ensued between news networkers editors writers and readers along their interconnecting chains The subject is topical Our understanding of reading and communications is undergoing major changes with the rise and proliferation of social media James I and Charles I faced new media and an unprecedented growth in informed public opinion fuelled by a flow of information that was essentially beyond the reach of government control So there are parallels with the contemporary struggle to adapt and there is a corresponding growth in the publication of history books reflecting upon the origins of the public sphere and the development of public opinion JAYNE E E BOYS is an independent scholar who lives in Suffolk and British Columbia *The Cambridge History of the Book in Britain* Richard Gameson, Lotte Hellinga, Nigel J. Morgan, Rodney M. Thomson, J. B. Trapp, John Barnard, David McKitterick, 1999-12-09 This volume of *The Cambridge History of the Book in Britain* presents an overview of the century and a half between the death of Chaucer in 1400 and the incorporation of the Stationers Company in 1557 The profound changes during that time in social political and religious conditions are reflected in the dissemination and reception of the written word The manuscript culture of Chaucer's day was replaced by an ambience in which printed books would become the norm The emphasis in this collection of essays is on the demand and use of books Patterns of ownership are identified as well as patterns of where why and how books were written printed bound acquired read and passed from hand to hand The book trade receives special attention with emphasis on the large part played by imports and on links with printers in other countries which were decisive for the development of printing and publishing in Britain In Arden: Editing Shakespeare - Essays In Honour of Richard Proudfoot Gordon McMullan, Ann Thompson, 2015-03-20 A collection of new and specially commissioned essays by an eminent team of Shakespeare scholars focusing on the particular issues relating to the editing of Shakespeare and other Renaissance texts The editing of dramatic and other literary texts has always been an important aspect of literary studies In recent years editing and the theoretical frameworks that underlie editing practices have become a lively and controversial focus of debate sparked both by

philosophical discussions on the death of the author and by the technological challenges presented by the possibilities of electronic texts Most national and international conferences on literature and drama include sessions on textual studies and editing and a number of monographs address particular issues relating to the editing of Shakespeare and other Renaissance texts but this is the first overall survey of the current state of the field The essays have been commissioned to honour Professor Richard Proudfoot Senior General Editor of the Arden Shakespeare and an internationally recognised authority in the field of Shakespeare textual scholarship who retired from King s College London in 1999 after 35 years This is a well planned focused and co ordinated volume makes a significant contribution to Shakespeare studies The contributors are a formidable and global group of scholars representing both traditional and contemporary viewpoints They include a number of Arden editors past and present as well as scholars who have edited texts for the main competitors

A History of British Publishing John Feather, 2003-09-02 This comprehensive history first published in 1987 covers the whole period in which books have been printed in Britain Though Gutenberg had the edge over Caxton England quickly established itself in the forefront of the international book trade The slow process of copying manuscripts gave way to an increasingly sophisticated trade in the printed word which brought original literature translations broadsheets and chapbooks and even the Bible within the purview of an increasingly broad slice of society Powerful political forces continued to control the book trade for centuries before the principle of freedom of opinion was established In the nineteenth and early twentieth centuries the competition from pirated USA editions where there were no copyright laws provided a powerful threat to the trade This period also saw the rise of remaindering cheap literature and many other modern features of the trade The author surveys all these developments bringing his history up to the present age

Shakespeare, Politics, and Italy Michael J. Redmond, 2016-04-01 The use of Italian culture in the Jacobean theatre was never an isolated gesture In considering the ideological repercussions of references to Italy in prominent works by Shakespeare and his contemporaries Michael J Redmond argues that early modern intertextuality was a dynamic process of allusion quotation and revision Beyond any individual narrative source Redmond foregrounds the fundamental role of Italian textual precedents in the staging of domestic anxieties about state crisis nationalism and court intrigue By focusing on the self conscious overt rehearsal of existing texts and genres the book offers a new approach to the intertextual strategies of early modern English political drama The pervasive circulation of Cinquecento political theorists like Machiavelli Castiglione and Guicciardini combined with recurrent English representations of Italy to ensure that the negotiation with previous writing formed an integral part of

the dramatic agendas of period plays *Early Modern Herbals and the Book Trade* Sarah Neville, 2022-01-06 Between 1525 and 1640 a remarkable phenomenon occurred in the world of print England saw the production of more than two dozen editions identified by their imprints or by contemporaries as herbals Sarah Neville explains how this genre grew from a series of tiny anonymous octavos to authoritative folio tomes with thousands of woodcuts and how these curious works quickly became valuable commodities within a competitive print marketplace Designed to serve readers across the social spectrum these rich material artifacts represented both a profitable investment for publishers and an opportunity for authors to establish their credibility as botanists Highlighting the shifting contingencies and regulations surrounding herbals and English printing during the sixteenth and early seventeenth century the book argues that the construction of scientific authority in Renaissance England was inextricably tied up with the circumstances governing print This title is also available as Open Access on Cambridge Core *Catalog of Printed Books of the Folger Shakespeare Library, Washington, D.
