

The background of the image is a high-angle aerial photograph of a river delta. The land is a mix of dark green and brown, indicating dense vegetation and possibly agricultural land. Numerous water bodies of varying shades of blue and turquoise are scattered across the landscape, separated by narrow, winding channels. The overall scene is a complex and intricate network of land and water.

Sustainable Development Of The Gangesbrahmaputrameghna Basins:

Sustainable Development of the Ganges-Brahmaputra-Meghna Basins Asit K. Biswas,Juha I. Uitto,2001 The Ganges Brahmaputra Meghna basin contains the largest number of the world's poor in any one region. The population is increasing steadily and unless the current development trends are broken poverty will become even more pervasive. The region is endowed with considerable natural resources that could be used to foster sustainable economic development. Water could be successfully used as the engine to promote economic development of the region which has been hindered because the most populous part of the basin is shared by three countries Bangladesh India and Nepal who have in the past been unable to agree to an integrated development plan. In Sustainable Development of the Ganges Brahmaputra Meghna Basins leading technocrats and intellectuals discuss how through cooperation between the countries concerned and by taking a holistic development approach the quality of life of the people of the basin could be improved significantly within a reasonable timeframe

Management of Transboundary Rivers and Lakes Olli Varis,Cecilia Tortajada,Asit K. Biswas,2008-03-15 Transboundary rivers and lakes are often the remaining new sources of water that can be developed for human uses. These water sources were not used in the past because of the many complexities involved. Written and edited by the world's leading water and legal experts this unique and authoritative book analyses the magnitudes of the transboundary water problems in different parts of the world. It also examines difficulties and constraints faced to resolve these problems

Water and Urban Development Paradigms Jan Feyen,Kelly Shannon,Matthew Neville,2008-09-03 Communication across and integration of disciplines in the urban water sector seems today more imperative than ever before.
