Svec 2004 6 Enlightenment Revolution And The Periodical Press:

Scandinavia in the Age of Revolution Pasi Ihalainen, Dr Karin Sennefelt, Mr Michael Bregnsbo, Mr Patrik Winton, 2013-07-28 The Age of Revolution is a term seldom used in Scandinavian historiography despite the fact that Scandinavia was far from untouched by the late eighteenth century revolutions in Europe and America. Scandinavia did experience its outbursts of radical thought, its assassinations and radical reforms, but these occurred within reasonably stable political structures, practices and ways of thinking. As recent research on the political cultures of the Nordic countries clearly demonstrates, the Danish, Finnish, Icelandic, Norwegian and Swedish experiences of the late eighteenth and early nineteenth centuries offer a more differentiated look at what constitutes revolutionary change in this period compared with other regions in Europe. They provide an alternative story of an incipient transition towards modernity, a Nordic model in which radical change takes place within an apparent continuity of the established order. The long-term products of the processes of change that began in the Age of Revolution were some of the most progressive and stable political systems in the modern world. At the same time, the Scandinavian countries provide a number of instances which are directly relevant to comparisons, particularly within the northwest European cultural area. Presenting the latest research on political culture in Scandinavia, this volume with twenty-seven contributions focuses on four key aspects: the crisis of monarchy, the transformation in political debate, the emerging influence of commercial interest in politics, and the shifting boundaries of political participation. Each section is preceded by an introduction that draws out the main themes of the chapters and how they contribute to the broader themes of the volume and to overall European history. Generously illustrated throughout, this book will introduce non-Scandinavian readers to developments in the Nordic countries during the late eighteenth and early nineteenth centuries and both complement and challenge research into the political cultures of Europe and America. *The Eighteenth-century Current Bibliography*, 2000

Protestants, protestantisme et pensée clandestine Laurent Jaffro, Geneviève Artigas-Menant, Antony McKenna, 2005 Les textes clandestins des XVII^e et XVIII^e siècles les plus étudiés jusqu'à maintenant sont des traités philosophiques d'inspiration antichrétienne. Mais la foi est aussi une source de production et de circulation clandestines. Depuis la Révolution de l'Edit de Nantes, les protestants français ont été contraints de s'exprimer par des voies détournées. Dans les numéros précédents de *La Lettre clandestine* ont abordé les questions des limites du corpus clandestin, de la filiation entre les courants de pensée, des marques de la clandestinité et du rôle de la Réforme dans la tradition critique. Ce neuvième dossier thématique est pour la première fois entièrement consacré à la question de la clandestinité protestante et de ses méthodes. Dans cette nouvelle enquête, *La Lettre clandestine* reste fidèle à ses préoccupations philosophiques, son souci d'interdisciplinarité et son attention à l'histoire du livre et de la lecture. Ce volume annuel fournit également une bibliographie exhaustive des études, une documentation des informations sur la littérature philosophique clandestine, l'âge classique et sur les recherches qui sont conduites dans le monde entier sur son sujet. *2006/2007*, 2011-09-15 Die seit 1971 wieder

Montesquieu and England Ursula Haskins
Gonthier, 2015-09-30 Gonthier sets Montesquieu's work in the context of early eighteenth century Anglo French relations taking a comparative approach to show how Montesquieu's engagement with English thought and writing persisted throughout his writing career.

Peripheries of the Enlightenment Richard Butterwick, Simon Davies, Gabriel Sánchez Espinosa, 2008 Enlightenment is a universal concept but its meaning is most clearly revealed by seeing how it was engaged with reconfigured or rejected on a local level. Peripheries of the Enlightenment seeks to rethink the centre periphery model and to consider the Enlightenment as a more widely spread movement with national regional and local varieties focusing on activity as much as ideas. The debate is introduced by two chapters which explore the notion of periphery from vantage points at the very heart of enlightened Europe: Ferney and Geneva. Through thirteen ensuing chapters the interaction between Enlightenment and periphery is explored in a variety of spatial and temporal contexts ranging from Mexico to Russia. Drawing on urban and provincial as well as national case studies contributors argue that we can learn at least as much about the Enlightenment from commentators at the geographical and cultural borders of the enlightened world as from its most radical theorists in its early epicentres. Crossing the boundaries between histories of literature religion science and political and economic thought Peripheries of the Enlightenment is not only international in its outlook but also interdisciplinary in its scope and offers readers a new and more global vision of the Enlightenment.

The British National Bibliography Arthur James Wells, 2006 Studi francesi, 2006 *The Invention of Free Press* Edoardo Tortarolo, 2016-03-09 Tracking the relationship between the theory of press control and the realities of practicing daily press censorship prior to publication this volume on the suppression of dissent in early modern Europe tackles a topic with many elusive and under researched characteristics. Pre publication censorship was common in absolutist regimes in Catholic and Protestant countries alike but how effective it was in practice remains open to debate. The Netherlands and England where critical content segued into outright lampoonery were unusual for hard wired press freedoms that arose respectively from a highly competitive publishing industry and highly decentralized political institutions. These nations remained extraordinary exceptions to a rule that for example in France did not end until the revolution of 1789. Here the author's European perspective provides a survey of the varying censorship regulations in European nations as well as the shifting meanings of freedom of the press. The analysis opens up fascinating insights afforded by careful reading of primary

archival sources into the reactions of censors confronted with manuscripts by authors seeking permission to publish Tortarolo sets the opinions on censorship of well known writers including Voltaire and Montesquieu alongside the commentary of anonymous censors allowing us to revisit some common views of eighteenth century history How far did these writers their reasoning stiffened by Enlightenment values promote dissident views of absolutist monarchies in Europe and what insights did governments gain from censors reports into the social tensions brewing under their rule These questions will excite dedicated researchers graduate students and discerning lay readers alike

Enlightenment, Revolution and the Periodical Press Hans-Jürgen Lüsebrink, Jeremy D. Popkin, 2004

Enlightenment, Revolution and the Periodical Press Hans-Jürgen Lüsebrink, 2004 Periodicals were an integral part of eighteenth century European civilisation This volume brings together original articles in English and French dealing with the press both in the main centres of Enlightenment thought and in such often neglected countries as Portugal and Sweden The contributions span the long eighteenth century from Germany in the 1690s to Britain in the post Napoleonic era They cover the full range of the period's press including manuscript newsletters political gazettes learned journals and revolutionary propaganda sheets João Lisboa and Marie Christine Skuncke show how periodicals allowed the circulation of news and political criticism even in societies such as Portugal and Sweden where audiences were limited and censorship was severe Anne Marie Mercier Faivre's study of press coverage of the Ottoman Empire shows that news reports gave a picture of oriental despotism very different from the literary construct of Montesquieu's *Lettres persanes* Bernadette Fort's essay on art criticism and Martin Stuber's analysis of the correspondence of a learned journal's editor broaden our understanding of the place of periodicals in the period's high culture The revolutionary era brought major innovations in the press although as Maria Lúcia Pallares Burke shows older genres such as the spectator were adapted to the new conditions Political radicals like Jacques Roux the focus of Eric Négrel's study and the German migrant journalists who had fled to France examined in Susanne Lachenicht's essay owed their careers to the press But the press could also serve conservative ends as Philip Harling demonstrates in his analysis of Tory journalism in England in the early nineteenth century Placed within a broader theoretical and historical context by Hans-Jürgen Lüsebrink Jack Censer and Jeremy Popkin these studies expand our picture of the role of periodicals in the age of Enlightenment and Revolution and suggest important new directions for further research
