

Nature vs nurture Argumentative Essay

Whereas nurture is the environment around us that can influence our upbringing and it is the society around us that affect the way we think or do certain things. It refers to a person's childhood and how they were brought up and what they learn. Nature vs. Nurture debate does not have a firm conclusion to say which one has more value as it is a debate that has been discussed between philosophers to identify which one has more influence in our lives. Some philosophers argue that the nature is most influential in our lives as it is part of our genetic makings, something that we cannot change even if we want to.

Others argue that nurture is more influential as it determines our personality and our perspective of things, the way we view things. For example, a teenager wanting to be a doctor when they grow up is not part of our nature, it goes more towards nurture because it is the way we are brought up that influences our decisions in life. If a child had a parent who is a doctor and they watch their parent making people feel becoming well, then they might want to do the same as they might get fascinated by it. This decision that the child made to become a doctor is the doing of nurture because the child was influenced by what he saw around him.

Nature on the other hand is nothing that can be fixed or change at any cost. For example, if a child was born with illness such as Cystic Fibrosis then this is something that they cannot recover from, they might get medication to help them survive but it is not something that they can get well from as it is part of their genetic making. Furthermore, some people argue that nurture has more influence in our lives because a serial killer does not become a murderer because it is in his genes, but because they are influenced by what they see around them.

Some philosophers claim that a person's development is influenced by both nature and nurture. For example, if a person is born with blonde hair and blue eyes, this is something natural that they cannot change, however, if they live in a posh area, then their accent would be posh; this is something that is nurture is responsible for because the community a person lives in *Wool_sld* determines the accent they would have. *Dry Money* and the boy with no penis is the story of David Rimes who was turned in to a girl when he was baby due to his Penis being burned off during circumcision.

When David was born he was called Bruce and his twin brother was called Brian. *Dry John Money* was a sexologist; he debates about sex changes operations on transsexual. When Bruce's penis was burned off, his parents Janet and Ron Rimes were very upset over and did not know what to do. When they found out about *Dry Money*, they finally found hope, knowing that he would be able to help their child. *Dry Money* believed that nurture can win out nature anytime. For example, he believed that

Cambridge Academic English B2 Upper Intermediate Teacher's Book Chris Sowton, Martin Hewings, 2012-02-09

Gives students further practice in academic study skills. Students analyse characteristics of written and spoken academic texts, develop awareness of academic culture and learn to avoid plagiarism. From essay organisation taking notes group discussion to writing references and paraphrasing texts. **Writing Argumentative Essays** Nancy V. Wood, 2000-05. This brief rhetoric helps students develop strategies for critical reading, critical thinking, research and writing that will help them argue clearly and convincingly. It teaches them to identify and develop arguments to read and form reactions and opinions of their own to analyze an audience to seek common ground and to use a wide realistic range of techniques to write argument papers that express their individual views and original perspectives on modern issues. It includes clear explanations and examples of argument theory and reading and writing processes, research and documentation skills and offers engaging class tested writing assignments and activities. 49 Essays for Analysis cover several broad issue and sub issue areas all of contemporary concern. Unique chapters discuss student argument styles, Rogerian argument and argument and literature. **Aspects of Language Development in an Intensive English Program** Alan Juffs, 2020-03-02. While there is much in the literature on ESL development, this book is the first of its kind to track the development of specific language abilities in an Intensive English Program (IEP) longitudinally and highlights the implications of this particular study's findings for future IEP implementation and practice and ESL and SLA research. The volume draws on many years worth of data from learners at an IEP at the University of Pittsburgh to explore selected aspects of language development including lexical, grammatical, speaking and writing abilities in addition to placement assessment practices and student learning outcomes. A concluding chapter points to the ways in which these findings can be applied to decision making around IEP curriculum development and the future role of IEPs in higher education more broadly. With its focus on students in IEP settings and the concentration on data from students evaluated over multiple semesters, this volume offers a unique opportunity in which to examine longitudinal developmental patterns of different L1 groups on a variety of measures from the same learners and will be key reading for students and researchers in second language acquisition, English for Academic Purposes, language education and applied linguistics. **Current Issues in Reading, Writing and Visual Literacy** Helene Christina Demirci, Christina Gitsaki, Melanie Taylor Gobert, 2015-10-28. This volume brings together a collection of papers presented at the 2014 World Congress of the International Association of Applied Linguistics (AILA) held in Brisbane, Australia and represents current research and practice from across the globe related to reading, writing and visual literacy. Given that globalisation has resulted in an increase in the pursuit of second language, often English, literacy for those who want to enhance their access to better education and employment options, the development of literacy skills cannot be left to chance. This book explores current efforts to tease out the variables involved in the development of literacies and will inform educators and teacher trainers of ways to improve.

classroom pedagogies and increase learner literacy competencies The volume will be of use to both new and seasoned researchers wishing to enhance their understanding of current and emerging perspectives in the development of literacies It will also be of interest to language teachers and language policy makers as the papers address current issues in language education
