## **Story Of Nim The Chimp Who Learned Language:**

**The Story of Nim** Anna Michel, 1980-01-01 Relates the story of Nim a chimpanzee who is being taught to use sign language to talk as part of a program to study language acquisition by animals *Nim* Herbert S. Terrace, 1979 **You Can't Say That!** Leonard S. Marcus, 2021-07-13 What happens when freedom of expression comes under threat In frank and wide ranging interviews historian and critic Leonard S Marcus probes the experience of thirteen leading authors of books for young people A powerful photo essay on transgender teens is called anti religious and anti family A meticulously researched primer on sex education stirs up accusations of pornography and child abuse Picture books about two mommies or two penguin daddies set off a hue and cry Two hugely popular children s series run afoul of would be censors one for its scatological humor the other because it s deemed too scary Kids books that touch on race sex LGBTQ matters the occult coarse language and more have found themselves under the scrutiny of those who challenge First Amendment rights Tune in as thirteen top children s and young adult authors speak out about what it s like to have your work banned or challenged in America today Prompted by Leonard S Marcus s insightful questions they discuss why their books have faced censorship both blatant and soft how the challenges have or haven t affected their writing and why some people feel they have the right to deny access to books In addition Leonard S Marcus puts First Amendment challenges in a historical context and takes a promising look at the vibrant support network that has risen up to protect and defend young people s rights Authors interviewed include Matt de la Pe a Robie H Harris Susan Kuklin David Levithan Meg Medina Lesl a Newman Katherine Paterson Dav Pilkey Justin Richardson and Peter Parnell Sonya Sones R L Stine Angie Thomas **Twenty-Four Stories From Psychology** John D. Hogan, 2019-08-12 A good story sets the stage for engaged learning Nowhere is this more important than in foundational courses such as Introductory or History of Psychology By weaving foundational and modern characters across a historical landscape John Hogan s Twenty Four Stories from Psychology captivates readers with the rich stories the who what where why and how for many of the major theories and colorful characters who have shaped the development of Psychology as a field *Reading and Learning to Read* Jo Anne L. Vacca, Richard T. Vacca, Mary K. Gove, 1987 [Why Chimpanzees Can't Learn Language and Only Humans Can](#) Herbert S. Terrace, 2019-10-01 In the 1970s the behavioral psychologist Herbert S Terrace led a remarkable experiment to see if a chimpanzee could be taught to use language A young ape named Nim Chimsky in a nod to the linguist whose theories Terrace challenged was raised by a family in New York and instructed in American Sign Language Initially Terrace thought that Nim could create sentences but later discovered that Nim s teachers inadvertently cued his signing Terrace concluded that Project Nim failed not because Nim couldn t create sentences but because he couldn t even learn words Language is a uniquely human quality and attempting to find it in animals is wishful thinking at best The failure of Project Nim meant we were no closer to understanding where language comes from In this book Terrace revisits Project Nim to offer a novel view of the origins of

human language In contrast to both Noam Chomsky and his critics Terrace contends that words as much as grammar are the cornerstones of language Retracing human evolution and developmental psychology he shows that nonverbal interaction is the foundation of infant language acquisition leading up to a child's first words By placing words and conversation before grammar we can for the first time account for the evolutionary basis of language Terrace argues that this theory explains Nim's inability to acquire words and more broadly the differences between human and animal communication Why Chimpanzees Can't Learn Language and Only Humans Can is a masterful statement of the nature of language and what it means to be human

The First Chimpanzee John Gribbin, Jeremy Cherfas, 2001 In the early 1980s the authors published The Monkey Puzzle which argued that humans are 100 per cent ape a sibling species to chimps and gorillas Dismissed at the time as armchair theorists research has vindicated them This revised edition of the earlier book brings to light subsequent research

Critical Kinship Studies Damien W. Riggs, Elizabeth Peel, 2016-09-15 This book draws together research on posthumanism and studies of kinship to elaborate an account of western human kinship practices Studies of kinship have increasingly sought to critique the normative assumptions that often underpin how caring relationships between humans are understood The categorisation of human and kinship is brought into question and this book examines who might be excluded through adherence to accepted categories and how a critical lens may broaden our understanding of caring relationships Bringing together a diverse array of analytic foci and theoretical lenses Critical Kinship Studies opens up new avenues for understanding what it means to be in relationships with others and in so doing challenges the human exceptionalism that has often limited how we think about family loss love and subjectivity

**The Talking Book** Jane De Suza, 2024-01-12 Are you ready to solve one of the world's biggest mysteries how we talk The story of communication begins in prehistoric times gallops through the dark arts untranslatable words and languages brought back from the dead and arrives in the age of AI Along the way we meet outstanding characters the one word man the 400 word monkey and the million word computer who play their part in the development of language Every tale in this book holds a clue to the gigantic puzzle of the evolution of language that has hypnotized brilliant minds over time Handprints of not quite humans on ancient cave walls secrets buried in ash from a seven year long winter forbidden experiments by kings on babies and even a rogue gene hiding in your DNA how do they all piece together WARNING Enjoy the rollercoaster ride of language hilarious histories and crazy quizzes but ignore the wise cracking dog who will insist he wrote this book

More Creative Uses of Children's Literature Mary Ann Paulin, 1992 To cover the immense publishing explosion of children's books films and other media for the 1980s Mary Ann Pauline has created an encyclopedic set of volumes to complement and update her celebrated book Creative Uses of Children's Literature
