## **Storytellers Story:**

*Digital Storytelling as Public History* Christina Fisanick, Robert O. Stakeley, 2020-12-23 *Digital Storytelling as Public History A Guidebook for Educators* provides a practical methodology for teaching public history in the digital age Drawing on a long standing collaboration Fisanick and Stakeley examine how and why educators in all arenas should adopt digital storytelling as a means for encouraging interest in local and regional history The book shows readers how to implement the strategies necessary to help storytellers in a variety of settings create short films that showcase the collections at local and regional historical societies and museums It also teaches storytellers higher executive functions such as independent project management peer and self critique and rhetorical savviness By guiding storytellers through this process of creating public history digital stories the book enables them to become connected to communities improve their understanding of regional history and expand their knowledge of the preservation of historical artifacts Supported by online handouts and offering a comprehensive methodology for educators this is the ideal guide for those teaching public history in the digital age across a range of educational settings including the classroom museum and community

**Handbook of Research on Transmedia Storytelling and Narrative Strategies** Yilmaz, Recep, Erdem, M. Nur, Resuloğlu, Filiz, 2018-07-06 Transmedia storytelling is defined as a process where integral elements of fiction get dispersed systematically across multiple delivery channels to create a unified and coordinated entertainment experience This process and its narrative models have had an increasing influence on the academic world in addressing both theoretical and practical dimensions of transmedia storytelling The *Handbook of Research on Transmedia Storytelling and Narrative Strategies* is a critical scholarly resource that explores the connections between consumers of media content and information parts that come from multimedia platforms as well as the concepts of narration and narrative styles Featuring coverage on a wide range of topics such as augmented reality digital society and marketing strategies this book explores narration as a method of relating to consumers This book is ideal for advertising professionals creative directors academicians scriptwriters researchers and upper level graduate students seeking current research on narrative marketing strategies

**Oral Storytelling and Teaching Mathematics** Michael Schiro, 2004-03-19 Click Additional Materials for downloadable sample This book presents two stories created by Michael Schiro and told by Doris Lawson in her mathematics classroom The authors lay a foundation for weaving together mathematics and an epic story The purpose of telling an epic story one that takes several days to finish is to guide students through several stages of learning in order to help them develop mathematical skills The story not only presents mathematical skills that students need to learn but also situates the mathematics in a context that is interesting engaging and relevant Part 1 *The Wizard's Tale* discusses teaching addition and multidigit number The full story with commentary is presented This story is intended primarily for second third and fourth grade students Part 2 *The Egypt Story* connects problem solving and the social studies curriculum by exploring ancient Egypt This story has been used with sixth graders An

accompanying CD contains the complete text of each story and the worksheets used during the lesson Various other materials needed are also described If it is true that every teacher is an actor or actress at heart the challenge to develop one's oral story telling skills is intriguing Equally important however is the rich discussion about such issues as the structural relationship among teachers students and mathematics the pedagogical issues in teaching and learning mathematics mathematics and culture multicultural mathematics instruction and ideology I would definitely recommend this book to all those who teach mathematics Jean Morrow Emporia State University MATHEMATICS TEACHING IN THE MIDDLE SCHOOL This book makes significant contributions to the field of mathematics education in many areas Its use of oral storytelling as a means of teaching algorithms and problem solving its presentation of a collaborative teaching model that can be generalized to all mathematics teaching its presentation of a new perspective on problem solving enhancing the currently popular approach and its insights into multicultural mathematics all provide a wealth of knowledge for pre service and in service classroom teachers as well as mathematics education instructors Dr Rainy M Cotti Rhode Island College It is very well written It avoids math education jargon but at the same time discusses deep issues in the subject References to the literature are useful and well chosen The book flows very well very well I liked the way of starting with stories and the stories of the classroom lessons This gives a good foundation for the more theoretical discussions later in the book Susan Addington California State University San Bernardino Epic oral storytelling is an exciting new instructional method that complements existing ways of teaching Oral Storytelling and Teaching Mathematics Pedagogical and Multicultural Perspectives provides the first serious exploration of the role that oral storytelling can play in helping children learn mathematics Oral Storytelling and Teaching Mathematics contains two case studies of teachers telling epic oral stories to teach math to elementary and middle school students The book also includes theoretical discussions of essential elements of oral storytelling multicultural education how oral storytelling can help children who have difficulty learning mathematics and mathematical problem solving This book significantly extends two pedagogical movements that have recently influenced mathematics teaching the use of physical manipulatives and visual imagery and the use of children's literature It takes a giant leap in leaving behind the written word for oral language and integrating serious mathematical explorations with fantasy Author Michael Stephen Schiro presents the teaching of mathematics often a high anxiety subject in a non threatening innovative fashion via the use of epic storytelling It is written in a conversational tone and includes numerous sample illustrations The book's presentation of stories how a teacher actually used them in class along with students responses and a discussion of the educational value of such strategies make this a comprehensive work that recognizes teachers capabilities and concerns about employing the best available educational practices The accompanying CD ROM contains the full text of two epic stories plus additional worksheets handouts and artwork This book will be of immediate interest to both pre service and in service teachers and all educators devoted to providing children powerful mathematical and literary experiences

Packet A.** Catharine Shaw,1884 Storytelling in Leslie Marmon Silko's Ceremony Berenice Walther,2007-01-30 Seminar paper from the year 2006 in the subject American Studies Literature grade 1 7 University of M nster Englisches Seminar course Contemporary American and Canadian Fiction language English abstract Oral storytelling is a tradition inherent to all cultures By definition its genre is determined by its original oral transmission many of the world s greatest literary classics such as El Cid La Chanson de Roland Beowulf or the Odyssey were originally orally transmitted In most cases the author is unknown and the story has undergone many modifications in the course of the telling processes still they are today s primary testimonies for language history culture and people of the past In this paper a definition of oral storytelling will be provided along with an introduction in order to define the subject matter as well as the significance of putting oral storytelling into writing as Silko did in Ceremony Leslie Marmon Silko was brought up in the Laguna Pueblo community in New Mexico a Native American tribe where storytelling plays an

important cultural role For Silko the process of writing her novel Ceremony was not only a way of staying sane as she states herself but also to identify with her Native American origins In this novel she points out the opposition between the Native stories about reciprocity with nature and Euro American stories of dominion This confrontation is a conflict of two paradigms reflecting the protagonist s Tayo s inner state of mind he has to reconstruct stories to reestablish an agreement with both cultures for himself The main focus will therefore be on the forms and functions of storytelling in the novel itself Hereby crucial aspects revolving around the cultural differences between Native American and Euro American culture the clash of cultures and both sides impact on the individual will be in the center of discussion The conclusion summarizes the paper s assessment of the results attained
