**Strategic Decision Making** Simon Haslam, Ben Shenoy, 2018-01-03 Making strategic decisions is a fundamental skill for leaders and managers. However, in a business environment that is in a constant state of change, making strategic decisions has never been more difficult. Strategic Decision Making addresses this challenge by providing a framework that can be used to make sound decisions in an uncertain world. Structured around the core concepts of framing, experimenting, and scaling, this book will ensure that efforts are focused where the need is greatest, that interventions are tested, evaluated, and revised if necessary, and that successful initiatives are effectively rolled out across the business. Packed with real world examples and backed up by academic research, Strategic Decision Making will allow today's leaders and the leaders of tomorrow to make successful and defensible business choices. It shows how to avoid decision making bias, overcome organizational inertia, manage the difficulties of rigid organizational structures, and avoid being side tracked by outdated or irrelevant experience. Essential reading for business practitioners and management students alike, this comprehensive guide provides a robust approach to achieving strategic success.

*Strategic Decisions and Weak Signals* Humbert Lesca, Nicolas Lesca, 2014-05-09 An increasing number of business executives, managers, and political leaders are using the concept of weak signals nowadays. There are also an increasing number of people trying to find out exactly what this concept means, as well as when and how to use it. Such questions arise particularly when it comes down to making strategic decisions. To help with these questions, this book defines the concept of the weak signal and then demonstrates how it would be useful in relation to strategic decisions and more precisely in relation to three moments of the strategic decision: i.e. The trigger of the strategic decision, what is the trigger, why and when, The development of the strategic decision, The implementation of the strategic decision.

**Strategic Decision-Making. A Practical Example Based on "Tesla"** Lukas Wagner, 2018-11-29  
Essay from the year 2017 in the subject Business economics Business Management Corporate Governance grade 10 Tongji University language English abstract Decision making is a fundamental skill for any successful executive But decisions at strategic level are hard to make They require large amounts of resources and commitments which may be irreversible They involve long term consequences that are hard to predict And they require considering multiple often conflicting strategic objectives which are difficult to balance particularly in the presence of risk and uncertainty Research and thinking about modern business strategy emerged as a field of study and practice in the 1960s Prior to that time the words strategy and competition rarely appeared in the most prominent management literature When influential academics in the USA started to

think fundamentally about strategic decision making in the 1980s and 90s they made the assumption that everything works in a competitive working free market and developed thereof generic strategy tools that are supposed to work everywhere However Elmes the guest speaker argues that they are not well founded since strategies need to be developed in the respective context of an industry or market This position will be explained in more detail during this essay Especially the determinant of market efficiency meaning how competitive a market is strongly influences the development of strategic decisions There are many industries where government involvement or asymmetric competition need to be considered to make strategic decisions whereby generic strategy tools tend to be ineffective Therefore the key questions for this essay will be firstly what are the traditional concepts of strategy and how have they evolved secondly what actually makes a strategy successful and lastly how does it apply in practice
