Strategic Doctrines And Their Alternatives:

Strategic Doctrines and Their Alternatives Yoshikazu Sakamoto, 1987 This book will give the reader a perspective into the core theory and practice of data mining and knowledge discovery DM KD Its chapters combine many theoretical foundations for various DM KD methods and they present an array of examples many of which are drawn from real life applications Most of the theoretical developments discussed are accompanied by an extensive empirical analysis which should give the reader both a deep theoretical and practical insight into the subjects covered The intended audience for this book includes graduate students studying data mining who have some background in mathematical logic and discrete optimization as well as researchers and practitioners in the same area **BOOK JACKET** The Alternative, 1974 *Defense and Disarmament Alternatives*, 1988 **Bernard Brodie and the Foundations of American Nuclear Strategy** Barry Howard Steiner, 1991 Steiner analyzes how and why Brodie's understanding of weapons of unparalleled explosive force led him to posit the need for revolutionary strategic thinking in broadminded analytic method and in the focus upon cities as nuclear targets He shows the tremendous effect Brodie's work had on the intellectual climate in which policy is determined particularly in his frequent combatting of conventional wisdom America's First Battles, 1776-1965 Charles E. Heller, William A. Stofft, 1986 This volume a collection of eleven original essays by many of the foremost U S military historians focuses on the transition of the Army from parade ground to battleground in each of nine wars the United States has fought Through careful analysis of organization training and tactical doctrine each essay seeks to explain the strengths and weaknesses evidenced by the outcome of the first significant engagement or campaign of the war The concluding essay sets out to synthesize the findings and to discover whether or not American first battles manifest a characteristic rhythm America's First Battles provides a novel and intellectually challenging view of how America has prepared for war and how operations and tactics have changed over time The thrust of the book the emphasis on operational history is at the forefront of scholarly activity in military history This book is part of the Modern War Studies series U.S. Defense Policy, U.S. Air Force Doctrine and Strategic Nuclear Weapon Systems, 1958-1964 George A. Reed, 1988 **American Aviation**, 1956 Issues for include Annual air transport progress issue **Nuclear Weapons and Foreign Policy** Henry Kissinger, 1957 Analyzes the revolution in military strategy and international diplomacy which has taken place as a result of the development of nuclear weapons **The Origins of SDI, 1944-1983** Donald R. Baucom, 1992 Most people think Star Wars began with the ideas of Ronald Reagan but its roots reach decades further back In this first scholarly account of the origins of the Strategic Defense Initiative SDI historian Don Baucom traces these roots back to the dawn of the missile age in 1944 He finds SDI emerging after a period of nearly 40 years from forces generated by technological developments changing strategic conditions and the collapse of the SALT arms control negotiations of the 1970s *Alternative Strategies for Desert Development and Management*, 1982 **The Dynamics of World Power: Eastern Europe and the Soviet Union**, edited
