Swords In The North:

Swords in the North ... Paul Anderson,1960 **Late Bronze Age Weapon Depositions of North-Western Europe** Tobias Mörtz,2024-11-20 The European Bronze Age ca 2200 to 800 BC is characterised by the deposition of metal artefacts in very different compositions and conditions They were usually deliberately abandoned in conspicuous places especially near bodies of water The purposes of these actions continue to be controversially interpreted in archaeological research with the spectrum of suggestions ranging from hidden treasures in times of crisis to concealed caches of craftsmen and traders to ritual offerings to superhuman beings Tobias M rtz systematically presents a specific group of these so called hoards and discusses their interpretation in a wider cultural scientific context Based on his own investigations of the original artefacts traces of wear and damage are identified on spearheads and swords from Britain France and Ireland indicating their use during violent conflicts and subsequent deliberate destruction by bending breaking crushing and burning The final concealment in wetlands and rivers ruled out a potential retrieval So were they sacrifices after warlike events What role did violence play in the Late Bronze Age Were the rituals also intended to contain it *Bronze Age Connections Across the North Sea* J. J. Butler,1963 **Swords from the North** Henry Treece,1969 **Weapons of Mass Destruction** Joseph M. Siracusa,Aiden Warren,2017-03-29 Whether possessed by a state or non state actor the specter of Weapons of Mass Destruction WMDs and more specifically nuclear weapons and their associated material present a significant threat to global security Notwithstanding the fact that there are fewer nuclear weapons today than the massive stockpiles that existed during the height of the Cold War the complexities relating to nuclear security have in many ways intensified amid globalization and porous borders More states in volatile regions possess such weapons UN Security Council states are busily modernizing their weapons and non states actors have made it clear their intention to use such weapons should they attain them The emerging prospect of a cyber attack or a misunderstanding that could potentially evolve into a limited regional nuclear war would both have dire global ramifications and are scenarios that should not be considered farfetched Additionally concerns pertaining to chemical and biological weapons the associated ramifications relating to nuclear terrorism and broader limitations of the NPT regime all pose major challenges to global stability In considering all of these areas this foundational primer for the Rowman and Littlefield WMD Series seeks to inform and advance policy debate in ways that support international security while also adding important connective tissue between analytical areas in the IR and historical domains that often remain separate Offering a comprehensive analysis of the evolution and current status of WMDs this volume will be of great interest to scholars analysts and students of security studies international history and international relations *Julius Cæsar, with illustr. from North's Plutarch* William Shakespeare,1887 *The Book of the Sword* Sir Richard Francis Burton,1884 **Temple Bar** ,1876 **"By My Sword and Shield"** E. Beating Plowshares Into Swords Paul A. C. Koistinen,1996 Koistinen describes how an undeveloped preindustrial economy forced Americans to fight defensive wars of attrition like the Revolution and the War of 1812 By the time of the Mexican War however a gradually maturing economy allowed the United States to use a much more offensive minded strategy to achieve its goals The book concludes with an exhaustive examination of the Civil War a conflict that both anticipated and differed from the total wars of the industrialized era Koistinen demonstrates that the North relied upon its enormous economic might to overwhelm the Confederacy through a strategy of annihilation while the South bungled its own strategy of attrition by failing to mobilize effectively a much less developed economy **The North American Review** James Russell Lowell,1888 Vols 227 230 no 2 include Stuff and nonsense v 5 6 no 8 Jan 1929 Aug 1930

Shakespeare's Plutarch. Being a Selection from the Lives in North's Plutarch which Illustrate Shakespeare's Plays. Ed. by Walter W. Skeat Plutarchus,1875 The poets and poetry of Europe, with intr. and biogr. notices, by H.W. Longfellow Henry Wadsworth Longfellow,1871 **The Colonial Records of North Carolina** North Carolina,1898

The Works of Lord Bacon Francis Bacon,1871 *The United States Army and Navy Journal and Gazette of the Regular and Volunteer Forces* ,1888 **Miniature Votive Offerings in the North-west Provinces of the Roman Empire** Philip Kiernan,2009

Miniature votive offerings are small non functional representations of day to day objects that are commonly found on sanctuary sites in the north west provinces of the Roman Empire They are frequently seen as evidence for a universal Romano Celtic rite of miniaturisation which enabled individual worshippers to dedicate models in the place of things they could not otherwise afford This practice is typically seen as belonging to a Roman tradition of making personal votive offerings which replaced the large scale ritual deposition of war booty and precious metal that had characterised Iron Age religion By considering these objects in light of their archaeological findspots distribution chronology and symbolic significance this book demonstrates that miniature votive offerings were not produced as part of a single ritual phenomenon The various types wheels arms and armour axes coins tools the so called Mithrassymbole etc were all produced for specific and often unrelated reasons Some were communal rather than individual offerings and functioned as substitutes for high value offerings of the past that were now no longer feasible Such offerings belong to a transitional phase between Iron Age and Roman religion Other miniature votive offerings deposited both by individuals and groups functioned as symbols of particular divinities or ritual acts and were used from the late Iron Age to the end of the Roman period Seemingly

insignificant and simple artefacts miniature votive offerings present a wealth of insight into ancient religious practices and mentalities
