Syllable Structure And Stress In Spanish A Nonlinear Analysis:

Syllable Structure and Stress in Spanish James Wesley Harris, 1983 In this book James Harris outlines important new results that impose strong constraints on the theory of Spanish phonology with consequences beyond Spanish and beyond the family of Romance languages Fonética Y Fonología Descriptivas de la Lengua Española Juana Gil, Joaquim Llisterri, 2024-06-03

The most up to date and comprehensive description of the Spanish language's phonetic and phonological system. Though there has been considerable research in Spanish phonology until now no in-depth and complete descriptive reference work has existed. *Fonética y fonología descriptivas de la lengua española* Volumes 1 and 2 is a comprehensive reference written in Spanish describing the phonetics and phonology of Spanish. Edited by Juana Gil, Fernández and Joaquim Llisterri, this set provides a comprehensive overview for understanding segmental and suprasegmental topics in Spanish phonology, making clear what further research is needed. The international set of contributors in this essential reference present evidence never before analyzed, introduce new theoretical concepts and issues not considered previously, extend the scope of the case studies and organize its many subtopics as well as suggest new topics for future research. A descriptive reference with copious figures and tables, this book is the key to the field's assumptions and a presentation of accepted research on which future scholarship is based. With state-of-the-art information on all topics related to the sounds of Spanish, *Fonética y fonología descriptivas de la lengua española* will be a valuable resource for researchers, students and scholars of Spanish linguistics who wish to deepen their understanding of the phonetic and phonological characteristics of all the varieties in the Spanish language.

Points of Convergence in Romance Linguistics Gabriela Alboiu, Ruth King, 2022-03-15 This volume brings together selected papers from the 48th annual Linguistics Symposium on Romance Languages held at York University in Toronto, Canada, in April 2018. It presents original research on a wide variety of Romance languages, both past (Latin, Old Catalan, Old Iberian Romance) and Old Spanish, Old Portuguese, and West Iberian Medieval Latin, and present (Brazilian Portuguese, Catalan, French, Picard, Portuguese, Romanian, and Spanish) along with a number of contemporary dialects, including Basque, Country Spanish, Dominican Spanish, Maine French, Neapolitan, and Picardie French. Divided into four sections (Interfaces, Bridging issues at the CP/TP/vP levels, Bridging issues at the PP/DP levels, and Bridging issues in linguistics), the volume gives researchers and advanced students access to contemporary issues and novel ideas bridging across various areas of Romance linguistics (e.g., morphology, syntax, semantics, phonology, sociolinguistics, first and second language acquisition).
