The Future of Canada's Auto Industry Ross Perry,1982 From the back cover In this study economist Ross Perry shows that all indicators point to a further restriction in the Canadian auto industry resulting in further shrinkage of employment and the possibility of a major deterioration in the

country's balance of payments. While the objective of the Auto Pact and Canadian automotive trade policy has always been job creation, Perry concludes that it will be increasingly difficult for the Canadian industry to be both viable and to generate jobs for the industrial heartland of Southern Ontario. Perry examines areas of specialization where Canada, with its advantages in energy-intensive products, could be competitive in the world market and he outlines the two basic options for national policymakers: restructuring the industry for viability or resisting its decline. In less than 30 years the Japanese automobile industry has risen from obscurity to become the world's leading automobile producer. This bibliography, which lists over 600 English language titles, focuses on the Japanese automobile industry and its development in the postwar era, especially the period of mass expansion from 1980 to the present. It touches particularly on topics pertaining to the Japanese automobile industry as it relates to the U.S. automobile industry, including the operation of the two industries, Japanese transplants in the United States, and government trade issues. It also features case studies of major Japanese automobile manufacturers. Coverage includes books, articles, conference papers, periodicals, government documents, and audio-visual materials.
