**William Chambers, Robert Chambers**

## **Straight To It:**

**Straight to the Point** Julie Leibrich, 1993 Based on interviews with randomly selected former offenders this book takes a fresh look at the course and nature of crime It cuts across theorising trying to understand what people actually experience why they do what they do and to get a picture of successful change As the Justice Department s Centennial Fellow Dr Leibrich tracked down fifty offenders who had been sentenced to supervision in 1987 and not reoffended three years later She asked them why not The people who participated in the interviews did so because they wanted to and their stories make this a moving piece of research The author soon found that going straight was curved that the people she interviewed did not fall into such neat categories as straight and crooked Her methodology which she describes in detail in the appendices needed to grapple with the many subtleties of her material and drew on different kinds of research strategies utilising their strengths In an exciting account of her approach to problem solving on the basis of trial and error and intuition the reader gains insight into the personal experience of the research process the pitfalls and highlights the frustration and anxiety of data collection Will I find Trinity Is the guy I m going to meet really okay Do I include people who have reoffended Does my write up reflect people s real experience The result this book is tight and rigorous in its analysis but does justice to the richness and warmth of the data valuing the words and actions of the people who participated in the study **BOOK JACKET**

Title Summary field provided by Blackwell North America Inc All Rights Reserved **Basta** Marco van Basten, 2020-11-05 Shortlisted for International Autobiography of the Year in the Telegraph Sports Book Awards 2021 This account is often poetic and sometimes haunting FourFourTwo Triple European Footballer of the Year Once World Footballer of the Year European Champion two UEFA Super Cups European Champion with the Dutch National Team in 1988 and numerous national championships with both Ajax and AC Milan Marco van Basten is known as one of the greatest footballers of all time but his personal life has always remained somewhat of a mystery until now Basta is the raw honest but above all gripping autobiography of Marco van Basten It s the unfiltered story of his rise to fame from being under the wing of Cruyff and experiencing life as an Ajax player to being propelled into the spotlight following Euros 88 and scoring the greatest goal ever to win a major final and playing for AC Milan at the peak of Italian football s popularity But despite countless successes Marco van Basten experienced many low points including losing a childhood friend battling with pain after his numerous fluffed operations and ultimately coming to terms with life after playing football Basta is his story *Space and Sense*

Susanna Millar, 2008-06-30 How do we perceive the space around us locate objects within it and make our way through it What do the senses contribute This book focuses on touch in order to examine which aspects of vision and touch overlap in spatial processing It argues that spatial processing depends crucially on integrating diverse sensory inputs as reference cues for the location distance or direction response that spatial tasks demand Space and Sense shows how perception by touch as by vision can be helped by external reference cues and that visual illusions that are also found in touch depend on common

factors and do not occur by chance Susanna Millar presents new evidence on the role of spatial cues in touch and movement both with and without vision and discusses the interaction of both touch and movement with vision in spatial tasks The book shows how perception by touch as by vision can be helped by external reference cues and that visual illusions that are also found in touch depend on common factors and do not occur by chance It challenges traditional views of explicit external reference cues showing that they can improve spatial recall with inputs from touch and movement contrary to the held belief Space and Sense provides empirical evidence for an important distinction between spatial vision and vision that excludes spatial cues in relation to touch This important new volume extends previous descriptions of bimodal effects in vision and space **Supreme Court** ,1875 Chambers's Information for the People William Chambers,Robert Chambers,1860
