*Disturbing the Nest* David Popenoe, 2020-10-14 *Disturbing the Nest* assesses the future of the family as an institution through an historical and comparative analysis of the nature causes and social implications of family change in advanced western societies such as the United States New Zealand and Switzerland by focusing on the one society in which family decline is found to be the greatest Sweden The founding of the modern Swedish welfare state was based in large part on the belief that it was necessary for the state to intervene in society in order to improve the situation of the family Of great concern was the low birthrate which was seen as a threat to the very survival of Swedes as a national population group The Social Democrats pioneered welfare measures that aimed to strengthen the family to alleviate its worst trials and tribulations and to make possible harmonious living With the Social Democrats remaining in power continuously until 1976 a period of almost forty five years Sweden went on to implement governmental family policies that are among the most comprehensive and expensive in the world In view of this major policy goal of family improvement the actual situation of the Swedish family today presents a genuine irony some have claimed that Swedish welfare state policies have had consequences that are the opposite of those originally intended Comparing contemporary Swedish family patterns with those of other advanced nations one finds a very high family dissolution rate probably the highest in the Western world and a high percentage of single parent female headed families Even marriage seems to have fallen increasingly out of favor with Sweden having the lowest marriage rate and latest age of first marriage and the highest rate of children born out of wedlock The early pronatalist aspirations of the Swedish government have been spectacularly unsuccessful as Sweden continues to have one of the world's lowest birthrates and smallest average family sizes

**Downsizing the U.S.A.** Thomas H. Naylor, William H. Willimon, 1997 In this trenchant analysis of American society Thomas H Naylor and William H Willimon take an unabashed stance against the belief that bigger is better and warn that size and technological complexity are not risk free There is a grave price to be paid for our uncritical affirmation of bigness universal solutions to problems dehumanizing uniformity and standardized mass production Naylor and Willimon argue that our government our cities our corporations our schools our churches our military and our social welfare system are all too big too powerful too intrusive too insular and too unresponsive to the needs of individual citizens and small local communities They propose specific strategies for decentralizing and downsizing virtually every major institution in America including America itself The authors audaciously call for the peaceful dissolution of the United States
