1964 dual concerns theory Secondarily focus group research assessed the field validity of the results Dual concerns theory postulates that organizational conflict involves balancing the desire to obtain one's own goals concern for production versus the desire to retain interpersonal relationships concern for people By placing the two aspects on an axis called the managerial grid Blake and Mouton mapped out five styles of managing conflict forcing avoiding accommodating compromising and problem solving Numerous studies validate the central ideas of the theory respondents rank styles of resolving conflict depending upon the degree of concern for retaining relationships versus the degree of concern for meeting goals However there is great disparity among study results In this study meta analytic techniques were used to provide a clearer overall picture of conflict resolution rankings Analyses were conducted of published and unpublished research results with statistical measures of conflict resolution style preferences focusing on the variables of worker minority status including ethnicity gender and foreign national and organizational role status of referent group including superior subordinate and peer The results of the meta analyses were 1 Ethnicity and foreign national insufficient studies for overall meta analysis tentative results using one instrument showed Asian ethnicities highest on avoiding Middle Easterners highest on compromising Hispanic Americans highest on accommodating African Americans lowest on avoiding and European Americans highest on problem solving 2 Gender meta analysis indicated females were significantly more likely to use accommodating and compromising males significantly preferred forcing 3 Organizational role meta analysis indicated respondents used avoiding significantly more with peers than with subordinates and compromising style less with subordinates than superiors Focus group results corroborated the results in general but there was strong consensus about the need to regard each individual as a unique combination of many influences Further research is needed particularly on multicultural status however due to the tendency for pertinent studies to favor more inclusive conflict resolution instruments than those utilized for the purposes of this research other means of overall analysis should be considered
