Big Data Analytics for Protein Bioinformatics Dariusz Mrozek,2018-09-25 This book presents a focus on proteins and
their structures The text describes various scalable solutions for protein structure similarity searching carried out at main
representation levels and for prediction of 3D structures of proteins Emphasis is placed on techniques that can be used to
accelerate similarity searches and protein structure modeling processes The content of the book is divided into four parts
The first part provides background information on proteins and their representation levels including a formal model of a 3D
protein structure used in computational processes and a brief overview of the technologies used in the solutions presented in
the book The second part of the book discusses Cloud services that are utilized in the development of scalable and reliable
cloud applications for 3D protein structure similarity searching and protein structure prediction The third part of the book
shows the utilization of scalable Big Data computational frameworks like Hadoop and Spark in massive 3D protein structure
alignments and identification of intrinsically disordered regions in protein structures The fourth part of the book focuses on
finding 3D protein structure similarities accelerated with the use of GPUs and the use of multithreading and relational
databases for efficient approximate searching on protein secondary structures The book introduces advanced techniques and
computational architectures that benefit from recent achievements in the field of computing and parallelism Recent
developments in computer science have allowed algorithms previously considered too time consuming to now be efficiently
used for applications in bioinformatics and the life sciences Given its depth of coverage the book will be of interest to
researchers and software developers working in the fields of structural bioinformatics and biomedical databases **Daily**
