In the Shadow of the Machine Jeremy Naydler,2018-05-29 Contemporary life is so deeply reliant upon digital technology that the computer has come to dominate almost every aspect of our culture What is the philosophical and spiritual significance of this dependence on electronic technology both for our relationship to nature and for the future of humanity And what processes in human perception and awareness have produced the situation we find ourselves in As Jeremy Naydler elucidates in this penetrating study we cannot understand the emergence of the computer without seeing it within the wider context of the evolution of human consciousness which has taken place over millennia Modern consciousness he shows has evolved in conjunction with the development of machines and under their intensifying shadow The computer was the product of a long historical development culminating in the scientific revolution of the 17th century It was during this period that the first mechanical calculators were invented and the project to create more complex

thinking machines began in earnest But the seeds were sown many hundreds of years earlier deep in antiquity Naydler paints a vast panorama depicting human development and the emergence of electronic technology His painstaking research illuminates an urgent question that concerns every living person today What does it mean to be human and what if anything distinguishes us from machines **Circulars** ,1884 **The Johns Hopkins University Circular** Johns Hopkins University,1884 Includes University catalogues President s report Financial report registers announcement material etc
