Explorations in Meteorology Kenneth C. Crawford, Oklahoma Climatological Survey, 2005-03 Developed by the Oklahoma Climatological Survey OCS research and service facility in concert with the University of Oklahoma EXPLORATIONS IN METEORLOGY places a strong emphasis on helping students understand weather and climate by using real meteorological data The activities in this lab manual require that students tap into the OCS archives of meteorological data in order to complete meteorological exercises Full color pictures and data graphs help students visually understand weather and severe weather topics The lab manual also challenges students by providing optional questions intended for honors students making this lab manual appropriate for both introductory and honors meteorology courses The Atmosphere Frederick K. Lutgens, Edward J. Tarbuck, 2007 Using everyday easy to grasp examples to reinforce basic concepts this highly regarded handbook remains the standard introduction to meteorology and the atmosphere components problems and applications Includes the most up to date coverage of topics such as ozone depletion the ultraviolet index temperature dew point temperature and orographic effects wildfires and weather thunderstorms and lightning the record breaking Florida hurricane season effects of air pollution and more Incorporates top quality visuals including new satellite images and illustrations by the award winning Dennis Tasa to demonstrate the highly visual nature of meteorology Uses a largely non technical writing style to help readers grasp important concepts For those interested in learning more about meteorology **Meteorology for Scientists and Engineers** Roland B.
