

in the yeshiva world, a world with which contemporary academic Judaic scholarship comes into far too little contact.

Secondly, at certain key moments the author is too willing to substitute impressions for analysis. Two very brief chapters consist of consecutive translations of the two versions of certain talmudic aggadot followed only by the assertion that comparison will show the Babylonian version to be more "dramatic" (pp. 86, 90). Another chapter, working in the same fashion, claims to provide "particularly convincing evidence of how the material [in the Babylonian Talmud] . . . has been structured by the editors so as to provide a strong element of dramatic effect" (p. 95). One more or less knows in all these cases what the author means, but rigorous argument requires something more than is provided; it demands articulated criteria of the "dramatic," detailed analysis of the relevant evidence, explicit statement of the implications of the finding. In chapter after chapter of the present book all of these were lacking, when scholarly armor of this kind would have strengthened an argument that is fundamentally sound and deserving of attention.

In conclusion, however, while one may wish that the views of the Babylonian Talmud presented here had been offered in a more powerful manner, one must also be grateful to Jacobs for shedding useful light on important questions, and for moving the discussion forward in the direction it must go.

He wants to know, he writes, "how do authors bearing so grave a responsibility, so lofty an ambition, as
