## The Caves Of Karst:

*The Caves of Karst* Lee Hoffman,1972    *Caves and Karst of Turkey - Vol. 1* Ali Yamaç,Eric Gilli,Ezgi Tok,Koray Törk,2021-01-04 This book comprehensively reviews the historical background of speleology and cave research in the contexts of archeology and natural sciences It also offers a summary of selected topics related to the karstic terrain of Turkey Covering 40 % of the country s surface area Turkey s karstic terrain accommodates thousands of caves However understanding the geology geomorphology hydrology biology and ecosystem dynamics of these caves is still limited Despite numerous explorations and extensive fieldwork this is the first comprehensive publication on the topic since 1984 The book presents the 45 most significant caves in Turkey selected according to several criteria including esthetical uniqueness It covers caves of global archeological importance such as Karain Yar mburgaz and ag zl and some of the world s deepest caves such as Peynirlilik n Kuzgun Morca and ukurp nar The book includes a survey and a detailed description of the genesis geology geomorphology and exploration history for each cave

*Caves and Karst of the Greenbrier Valley in West Virginia* William B. White,2017-11-20 The focus of this book is on the more than 2000 caves of the Greenbrier Valley of West Virginia of which the 14 with lengths greater than 10 km have an aggregate length of 639 km The major caves form the core part of sub basins which drain to big springs and ultimately to the Greenbrier River Individual chapters of this book describe each of the major caves and its associated drainage basin The caves are formed in the Mississippian Greenbrier Limestone in a setting of undulating gentle folds Fractures lineaments and confining layers within the limestone are the main controlling factors The caves underlie an extensive sinkhole plain which may relate to a major erosion surface The caves are habitat for both aquatic and terrestrial organisms which are cataloged and described as are the paleontological remains found in some of the caves The sinkhole plain of the Greenbrier karst and the underlying complex of cave systems are the end result of at least a ten million year history of landscape evolution which can be traced through the evolving sequence of cave passages and which is described in this book

**Guidelines for Cave and Karst Protection** John Watson,1997 Cave and karst landforms are distributed widely around the world They have many values and are an integral component of the world s biodiversity Some are habitats for a wide range of endemic species of flora and fauna while others house rare and endangered species Still others are the sources of rare minerals and some are important for resources such as groundwater while some are venerated as sites of religious spiritual and cultural importance Many such landforms encompass one or many of these values As special places cave and karst landforms require special management This small booklet has been prepared as a brief guide for planners managers and users of cave and karst estates and provides general information and practical guidelines for the management of cave and karst ecosystems

**Hypogene Karst Regions and Caves of the World** Alexander Klimchouk,Arthur N. Palmer,Jo De Waele,Augusto S. Auler,Philippe Audra,2017-08-17 This book illustrates the diversity of hypogene speleogenetic processes and void conduit patterns depending on variations of the geological

environments by presenting regional and cave specific case studies. The cases include both well known and newly recognized hypogene karst regions and caves of the world. They all focus on geological, hydrogeological, geodynamical and evolutionary contexts of hypogene speleogenesis. The last decade has witnessed the boost in recognition of the possibility, global occurrence and practical importance of hypogene karstification speleogenesis i.e. the development of solutional porosity and permeability by upwelling flow independent of recharge from the overlying or immediately adjacent surface. Hypogene karst has been identified and documented in many regions where it was previously overlooked or misinterpreted. The book enriches the basis for generalization and categorization of hypogene karst and thus improves our ability to adequately model hypogene karstification and predict related porosity and permeability. It is a book which benefits every researcher, student and practitioner dealing with karst.

**The Dinaric Karst System of Croatia** Mladen Garasic, 2021-09-28 This book offers readers a thorough introduction to the Dinaric Karst System in Croatia. As the first comprehensive book on the country's caves and karst, it presents a wealth of fascinating photographs from its karst underground. To date, ca 12 000 caves and pits have been confirmed in Croatia, approximately 35% of which contain constant groundwater. Knowing the amount, direction and quality of groundwater that has been discovered in caves of the Croatian karst allows us to predict with greater certainty the hydrogeological situation of some karst areas where no special drilling or borehole measurements were performed. In the process of building highways in the country's karst regions over the last thirty years, thousands of caverns, speleological features without natural entrances, were discovered and thoroughly explored. All of them were geologically mapped, surveyed and photographed in detail. Extensive research was systematically carried out in Croatian karst regions on sections of roads, highways, cuttings, slides, tunnels, bridge foundations, viaducts, etc. while creating ca 800 kilometers of highways such as the Zagreb-Rijeka highway, Zagreb-Split-Dubrovnik highway, Y-Ipsilon of Istria semi-highway, Rijeka-Rupa highway, Zagreb-Zadar semi-highway and the Rijeka bypass. Some of these caverns contain major chambers like in the Sveti Rok tunnel and in some of them like in the Vrata tunnel, it was even necessary to build a bridge. This bridge is the longest one in the world, built in a tunnel over a cavern. The book describes this and many more features of the cave exploration of the Dinaric Karst System of Croatia, making it a valuable resource for researchers, engineers, cavers and all other readers interested in karst.

*Australian Caves and Karst Systems* John Webb, Susan White, Garry K. Smith, 2023-08-31 This book, part of the series *Cave and Karst Systems of the World*, begins with a review of the interaction between people and caves in Australia, including conservation, followed by descriptions of the spectacular cave diving sites before comprehensively covering all the major carbonate and noncarbonate karst areas, subdivided by rock type and region, and including the origin of the caves. This is followed by broad overviews of cave minerals and speleothems, cave biology and cave fossils. Each section was written by one or more specialists in the topic and is illustrated by clear diagrams and superb colour photos. The book emphasises the unique aspects of the Australian karst, including the variability in the age of the caves, from very old to very young, and the impact

of isolation on the stygofauna as well as the vertebrate fossils preserved in the caves Written in an easy to read style the book is a primary reference guide to Australian karst and represents a valuable asset for anyone interested in the topic not only cavers and academics [Encyclopedia of Caves and Karst Science](#) John Gunn,2004-08-02 The Encyclopedia of Caves and Karst Science contains 350 alphabetically arranged entries The topics include cave and karst geoscience cave archaeology and human use of caves art in caves hydrology and groundwater cave and karst history and conservation and management The Encyclopedia is extensively illustrated with photographs maps diagrams and tables and has thematic content lists and a comprehensive index to facilitate searching and browsing [Caves and Karst of the Yorkshire Dales](#) David J. **Coastal Karst Landforms** Michael J. Lace,John E. Mylroie,2013-06-28 Carbonate rock coasts are found world wide from continental shorelines of the Adriatic Sea of Europe to the Yucatan Peninsula of North America and on tropical islands from Rodrigues Island in the Indian Ocean to the Mariana Islands in the Pacific Ocean to the Bahama Islands in the Atlantic Ocean Such coasts are well known for their unusual and distinctive karst landforms Karst processes particularly those associated with coastal landforms are proving to be surprisingly unique and complex This volume presents a comprehensive overview of the processes associated with coastal karst development comparing examples from a broad geographical and geomorphological range of island and continental shoreline paleoshoreline settings including a review of pseudokarst processes that can compete with and overprint dynamic coastal karst landscapes As effective management of hydrologic resources grows more complex coastal caves and karst

represent fundamental components in associated coastal aquifers which in the rock record can also form significant petroleum reservoirs Audience By providing a clearer understanding of the geological biological archaeological and cultural value of coastal caves and karst resources this volume offers a critical tool to coastal researchers and geoscientists in related fields and to coastal land managers as it illustrates the diversity of coastal karst landforms the unique processes which formed them the diversity of resources they harbor and their relationship to coastal zone preservation strategies and the development of sustainable management approaches
