The Central Wales Line:

Railways in South Wales and the Central Wales Line in the Late 20th Century Peter J. Green, 2022-12-01 In the early 1980s I began to visit South Wales on a regular basis to photograph the railway scene At that time the collieries and steelworks were generating a lot of rail traffic with Class 37 diesels being the usual motive power Passenger trains were in the hands of Class 47s and 37s while Peaks and Class 50s would also appear on occasion HSTs DMUs Sprinters and Pacers were of course also common As time went on collieries closed and the coal traffic reduced but there always something new and interesting Rugby Internationals at Cardiff regularly produced a number of special trains which arrived from various parts of the country often bringing interesting motive power to the Welsh capital The Class 37s were slowly replaced by Class 56s and later Class 60s on many duties in South Wales but the Rhymney Valley saw Class 37 diesels working passenger trains into the twenty first century and on Rugby International days privately owned Class 50s were also used on occasion I also visited the Central Wales line a number of times and particularly enjoyed the time I spent at the small country stations before the semaphore signals were replaced This book contains a selection of photographs taken in the latter part of the 20th and in the very early 21st Century covering the railways of South Wales and the Welsh section of the Central Wales line A few photographs of the principal heritage railways in more recent times are also included **Lost Lines** Tom

Ferris, 2020-07-05 The Mid Wales Line ran from 60 miles from Moat Lane Junction near Caersws to Brecon passing through the old counties of Montgomery Radnorshire and Brecknock It followed the river valleys of the Upper Severn the Dulas the Marteg and the Wye serving the towns and villages along its route for just short of 100 years This classic Welsh rural railway is recalled in a delightful selection of nostalgic photographs of its trains and stations **The Central Wales Line** Audrey

Doughty, 1971 **Lost Lines of Wales** Jamie Green, 2021-06-24 Having covered the southern section of the Central Wales Line and its branches in Swansea to Llandovery this volume traces the line from Llandovery to Craven Arms where it met the North its country stations signal boxes and heavy goods and express trains largely replaced by simple request stops and single car diesel units **The Railway Times ...** , 1855 *The Country Railway* Tim Bryan, 2013-09-20 Britain s towns and cities were famously transformed in the nineteenth century by the coming of the railways turning their fortunes around and giving urban dwellers new opportunities to travel across the country yet the effect on the rural population was arguably far greater Whilst some of the initial trunk lines were designed to link major cities the network of smaller cross country and branch lines that followed opened up large tracts of previously remote countryside providing new markets for agricultural produce and ending the isolation of many rural communities and such was the pace of development during the Railway Mania period that by the end of the nineteenth century there were few areas of country not served by train This book tells the story of these railways from golden age to decline in the wake of nationalization and the Beeching Report in the mid twentieth century and indeed contemporary efforts to restore and preserve them **Railway Times** , 1855 *The Day the*

Trains Came Helen J. Simpson,1997 **Worrall's Directory of South Wales, Etc** Directories. - Wales, South,1875 **The World's First Railway System** Mark Casson,2009-09-10 The British railway network was a monument to Victorian private enterprise Its masterpieces of civil engineering were emulated around the world But its performance was controversial praised for promoting a high density of lines it was also criticised for wasteful duplication of routes This is the first history of the British railway system written from a modern economic perspective It uses counterfactual analysis to construct an alternative network to represent the most efficient alternative rail network that could have been constructed given what was known at the time the first time this has been done It reveals how weaknesses in regulation and defects in government policy resulted in enormous inefficiency in the Victorian system that Britain lives with today British railway companies developed into powerful regional monopolies which then contested each other's territories When denied access to existing lines in rival territories they built duplicate lines instead Plans for an integrated national system sponsored by William Gladstone were blocked by Members of Parliament because of a perceived conflict with the local interests they represented Each town wanted more railways than its neighbours and so too many lines were built The costs of these surplus lines led ultimately to higher fares and freight charges which impaired the performance of the economy The book will be the definitive source of reference for those interested in the economic history of the British railway system It makes use of a major new historical source deposited railway plans integrates transport and local history through its regional analysis of the railway system and provides a comprehensive classified bibliography **Traffic Cases** Great Britain.
