

THE CHANGING FACE of AIDS

Thirty years ago the first cases of AIDS were reported and were attributed to the young men in Los Angeles. By the following summer, the illness was spreading nationwide and within four years a name, acquired immunodeficiency syndrome, or AIDS, in the emerging literature, AIDS and the virus that leads to it, HIV, had become a household name. Thankfully, with public education and advanced medical care, many lives have been saved in AIDS-related health care, but we're still getting very long lines.
