**Chemistry of Polymers** John W Nicholson, 2007-10-31 The Chemistry of Polymers Third edition is a well established and highly readable introductory text book on polymer science ideal for chemists requiring a broad introduction to the subject Like its predecessors it has been written primarily from an applications point of view emphasising practical applications and providing a comprehensive introduction on all aspects of polymer science including polymer synthesis characterisation reaction kinetics and materials science Specialised topics such as polymer degradation polymers and pollution and a variety of technological developments are also discussed in an informative and up to date manner This third edition of the book has been extensively revised to include the latest developments in polymer science Highlights and updates include a new chapter on dendrimers a field of chemistry that has grown enormously in the last ten years Coverage of Special topics in polymer chemistry and Polymers in the environment have both been updated to reflect recent developments in the field including polymer recycling This text is essential reading for university students teachers and scientists who wish to acquire an up to the minute overview of polymer science and its many specialised topics in an informative and easy to read style

**Conservation of Books** Abigail Bainbridge, 2023-03-27 Conservation of Books is the highly anticipated reference work on global book structures and their conservation offering the first modern comprehensive overview on this subject The volume takes an international approach to its subject Written by over 70 specialists in conservation and conservation science based in 19 countries its 26 chapters cover traditional book structures from around the world the materials from which they are made and how they degrade and how to preserve and conserve them It also examines the theoretical underpinnings of conservation what and how to treat and the ethical cultural and economic implications of treatment Technical drawings and photographs illustrate the structures and treatments examined throughout the book Ultimately readers gain an in depth understanding of the materiality of books in numerous global contexts and reflect on the practical considerations involved in their analysis and treatment Conservation of Books is a quintessential reference work for book conservators and anyone working with books such as collection managers librarians curators dealers collectors historians and related professionals It is also an indispensable text for students to complement hands on training in this field *Chemistry of Polymers* J.W.

Nicholson, 1991-12-31 The Chemistry of Polymers fourth edition is a fully updated new edition of the well established and highly readable introductory text book on polymer science ideal for those requiring a broad overview of the subject

**Recent Developments in Polymer Macro, Micro and Nano Blends** P.M. Visakh, Gordana Markovic, Daniel Pasquini, 2016-08-24 Recent Developments in Polymer Macro Micro and Nano Blends Preparation and Characterisation discusses the various types of techniques that are currently used for the characterization of polymer based macro micro and nano blends It summarizes recent technical research accomplishments emphasizing a broad range of characterization methods In addition the book discusses preparation methods and applications for various types of polymer based macro

micro and nano blends Chapters include thermoplastic based polymer nano blends applications of rubber based and thermoplastic blends micro nanostructures polymer blends containing block copolymers advances in polymer inorganic hybrids as membrane materials synthesis of polymer inorganic hybrids through heterophase polymerizations nanoporous polymer foams from nanostructured polymer blends and natural polymeric biodegradable nano blends for protein delivery Describes the techniques pertaining to a kind or small number of blends showing specific examples of their applications Covers micro macro and nano polymer blends Contains contributions from leading experts in the field Applied Polymer Science Ulf W. Gedde, Mikael S. Hedenqvist, Minna Hakkarainen, Fritjof Nilsson, Oisik Das, 2021-10-29 This companion volume to Fundamental Polymer Science Gedde and Hedenqvist 2019 offers detailed insights from leading practitioners into experimental methods simulation and modelling mechanical and transport properties processing and sustainability issues Separate chapters are devoted to thermal analysis microscopy spectroscopy scattering methods and chromatography Special problems and pitfalls related to the study of polymers are addressed Careful editing for consistency and cross referencing among the chapters high quality graphics worked out examples and numerous references to the specialist literature make Applied Polymer Science an essential reference for advanced students and practicing chemists physicists and engineers who want to solve problems with the use of polymeric materials **Journal of the Chemical Society**, 1992 **Sensory Polymers** José Miguel García, Saúl Vallejos, Miriam Trigo-López, 2024-08-01 Sensory Polymers From their Design to Practical Applications discusses recent developments in the field of sensory polymers and showcases the potential applications of these materials in food control and security civil security the biomedical field environmental control and remediation industrial control of chemicals and more Written by worldwide experts in the field chapters provide in depth knowledge on several different polymer sensors and their response to different stimuli which makes this book a valuable resource for researchers and advanced students in polymer science materials science and chemistry as well as those interested on sensing applications and chemical sensory systems including industry R D Discusses the foundation of sensory polymers from material design to development and production Explores state of the art applications in environmental control biomedicine sensing the chemical industry and food science Provides perspectives and future applications of polymer chemosensors Reader's Guide to the History of Science Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn **Molecularly Imprinted Polymer Composites** Sooraj M.P., Archana S. Nair, Beena Mathew, Sabu Thomas, 2020-12-01 Molecular Imprinted Polymer Composites Synthesis Characterisation and Applications covers the design of composite materials containing nanostructures and molecular imprinted polymers that has materialized the ever sought

out vision of homogeneous molecular imprinted polymers The inherent high surface to volume ratio of nanostructures has served well in increasing the surface area of conventional bulk polymers In recent decades molecularly imprinted polymer nanocomposite materials have attracted much attention for their potential applications in the fields of separation science sensing drug delivery waste water treatment and catalysis hence this book provides a much needed update on progress Includes information on molecular imprinted polymer composites and their potential for commercialization Discusses their synthesis characterization and applications Analyzes the effect of incorporation of different nanostructures on the thermodynamic kinetic and adsorption behavior of imprinted sorbents
